

Education In Love & Understanding God's Loving Laws

Introduction (20161104-1920-1920-jesus-dt-agp-leugll--Introduction--en-outline)

Purpose of "Education In Love" Assistance Groups: God's universe operates on God's Love - Every one of God's Laws from the smallest affecting our physical life and the greatest affecting our soul based life are all based on love - It makes logical sense to get an education in love, and in particular, God's Love.

Questions: Am I going to be my real self? - Am I going to have a relationship with God? - Am I going to connect to the other half of myself? - Everyone treats these questions as optional, but all of these questions must be answered in the long term, and God's Laws dictate that this is so.

Why "Understand God's Loving Laws": God's Laws are an expression of God's Love & state God's Intentions - God's Laws educate us about God's definition of love - God's Laws demonstrate to us where pain and suffering comes from.

Benefits of Understanding God's Law	Results of Not Understanding God's Law
Understanding God becomes possible	Understanding God is not possible
A relationship with God becomes possible	A relationship with God is not possible
I gain an education about Love	I remain uneducated about Love
My redemption and transformation becomes possible	My redemption and transformation is not possible
I understand the causes of my current condition and pain	I remain confused as to the causes of my current condition and pain
I develop faith in God, God's Goodness and God's Creations	I remain without faith in God, God's Goodness and God's Creations
I gain an understanding of God's Truth	I do not understand God's Truth
I now understand what makes myself and others happy	(since God's Laws are God's Truth) I do not understand the causes of my own unhappiness and the unhappiness of others
I have the potential to use my will positively to bring happiness to myself and others	I do not understand how to live a complete, fulfilling and happy life
My life is governed only by the highest laws and I continuously benefit from engaging the highest laws	My life is limited by the fundamental Laws and I cannot experience the benefit of engaging higher laws

Conclusion: During the week, focus on principles and the application of principles - Make time and spend time seeing how these principles can be applied in daily life - Are we here to Love, or just talk about Love? - Most participants still need to question their own will to Love - Needing to continually raise the same issues is an indication of lack of will

Fundamental Facts (20161119-1030-1030-jesus-dt-agp-leugll--Fundamental Facts--en-outline)

God - God is an infinite entity who existed before the Universe itself - God has Personality, Characteristics, Attributes, Nature and Desires - Each attribute is completed and perfected in God Each attribute is not God, but only a part of God - God is Love, but Love is not God, but rather an Attribute of God - God is Truth, but Truth is not God, but rather an Attribute of God - God is Law, but Law is not God, but rather an Attribute of God - God is Will, but Will is not God, but rather an Attribute of God - Love, Truth, Law and Will are only parts of God - God's full personality, attributes, character, nature and desires are infinite -

God's Universe: **God's Universe Diagram**

circle 1: God's Character - Attributes & Desires includes **circle 2: God's Principles of Law** includes **circle 3: God's Laws** includes this **circle 4: God's Creations - The Universe - Non-Living Matter - Living Creatures - The Human Soul**

God's Principles - Properties of God's Principles - God's Principles form a framework for Law
Each law governed by the principles automatically achieve the goals and objectives of the principles - God's Principles can be grouped into classes for the purpose of examination

Groups of God's Principles

Foundation principles: Love – Truth – Economy – Function – Life - Permanence – Development – Scope

Order principles: Hierarchy – Governance - Responsibility – Compensation

Soul specific principles: Will – Desire - Redemption – Transformation

God's Laws - Properties of God's Laws

Self-Maintaining Creations of God - Governed by God's Principles - Driven by God's Character, Attributes and Desires - Powered by God's Energy - Provide loving consequences (in the form of benefits) when they are obeyed - Provide loving consequences (in the form of correction) when they are disobeyed

Facts about God's Laws

Fact : Potentially an infinite number of God's Laws exist

Consequence: Detailed discussion and understanding of the individual operations of each law is difficult and very time consuming unless God has provided a simple way of understanding them - Humans will be in a process of eternal discovery of God's Laws, and human understanding of God's Laws currently is very limited, rudimentary and unsophisticated - The discussion of individual laws is not an economical use of our time, energy or resources. It becomes impossible to discuss in any detail any single law within our 34 hour programme

Fact: New laws are created every moment

Consequence: You will learn how this is possible during the week. We cannot discuss each law at the speed that each new law is being created. The irony is that the more we discuss each law the farther we get behind in knowing all of the laws.

Fact: Understanding God's Principles and God's Laws requires understanding God's Character, Nature and Personality

Consequence: The secret to understanding law is to be able to feel God's Personality, Character, Nature and Attributes, and see how these parts of God form the Governing Principles of God's Laws Even intellectually, it is far more productive to discuss the Governing Principles of God's Laws than to discuss God's Laws themselves

Fact: Understanding God's Laws requires following "God's Way"

Consequence: A person who does not follow God's Way will not be able to emotionally or intellectually grasp the important and fundamental details of the Principles governing God's Laws, or the operations of the laws themselves.

Unless humans are transformed at the soul level the mind's intellectual capacity, and the soul's emotional capacity remains limited, finite, and illogical, unable to understand God's infinite Wisdom, God's Principles or God's Laws

Fact: God's Laws are complex, intricate and mathematically defined

Consequence: God's Laws have intricate relationships between each other - God's Laws by nature have complex mathematical definitions and structure and form the fundamental scientific truth of the universe

Fact: God's Laws cannot be broken

Consequence: Humans can attempt to rebel against God's Law but the rebellion will not be successful and they cannot exist outside of God's Law or outside of the laws natural workings

Fact: Jesus & Mary have spent 2000 years examining God's Laws and the Principles guiding Laws

Consequence: It is impossible to transfer their knowledge to attendees in a 34 hour programme - It is impossible to transmit a soul based understanding of law to people who are just beginning the process of transformation - The examples provided in this programme are not preferred examples, but rather are examples geared towards human's current limited understanding.

Comments from Our Spirit Friends

"The audience must beware of attempts to intellectualise and categorise law. The sum total of Law is infinitely greater than the parts Jesus will be able to explain to you in the time he has available.

"God's Laws have intricate workings, and it cannot be assumed that the small amount of principles Jesus shares with you for the purpose of beginning your awakening to the understanding of God's Loving Laws are a complete discussion, or even anything more than a brief introduction on the subject.

"God's Design of Law is far too complex to explain to the audience in their current condition. As they grow towards God far more will become clear and more truth will be understood. Jesus has created this group to hopefully inspire you on the path of discovering God's Laws, and to demonstrate to you the wealth of Truth that God has available to those who seek for it."

Conclusion

Principles to be discussed - We shall outline the definition, objectives, application, what the principle reveals about God, and give some examples of laws are governed by these principles. Each discussion is a very basic presentation of the subject - Each presentation is designed to give very basic factual truth about each principle and inspire further exploration of the subject. - There are many more principles that we could discuss that we do not have time to discuss in the program. Engage the program with consideration and enthusiasm - I will be on time for all of the sessions I will participate in all of the sessions - I will engage the homework and prepare my questions for each session - This session: Foundation Principles - We are going to continue the "Foundation Principles" for 2 days

Summary

Fundamental facts include: God is an infinite entity - God's Personality, Characteristics, Attributes & Desires govern God's Principles - God's Principles of Law govern God's Laws - God's Laws govern the creation itself - Billions of Laws exist - Understanding Law requires following "God's Way" & receiving God's Love

Love & Truth Principle

Jesus briefly summarizes God's Principles of Love & Truth that govern the operation of God's Laws, gives examples of the way these principles are built into God's Laws, and answers audience questions about the principles.

Summary: Love principles envelop God's Love around each creation, principle and law ensuring:

Love governs all principles - Love is enforced, compelled and upheld - All creation experiences God's Love in different degrees - All creation demonstrates and facilitates the flow of God's principled love - The human soul can enter a love-based relationship with God

Definition (What the principles are): The law shall be love and uphold love - The law enforces and compels love - The law demonstrates and facilitates the understanding of love - The law is compassionate

Objectives: To ensure all creation experiences the expression of God's Love - To ensure the human soul learns about the availability of God's Personal Love - To ensure the survival of all creation collectively - To ensure loving order in all creation

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): God's great desire is for all of His creation to be loved - God's Love is the highest governing principle of the Universe - God feels Love is more important than all other things

Examples (The principles' applications in law): Gravity: Lovingly promotes an environment that results in my being able to fearlessly express myself and enjoy my life.

Aerodynamics: Gives me a possible experience which exceeds my gravity-bound state resulting in enhanced joy and amazing wonder.

Law of Compensation: Compensation lets me know when love has been upheld or compromised by my attitudes, emotions, thoughts or actions.

Law of Forgiveness: Compassion is demonstrated to me if I am repentant by allowing forgiveness for unloving emotions, feelings, thoughts and actions taken, even when I cannot correct all of the effects of what I have done.

Conclusion: Love principles: Are impossible for humans to apply fully without receiving God's Love - Ensure purposeful existence and happiness for all creation - Are principles most frequently opposed and ignored by humans - Are the principles we have been teaching

Truth principles

Summary: Truth principles envelop God's Truth around each creation, principle and law ensuring:

Truth is inseparably joined with Love as the highest of all principles - Truth is enforced and compelled - All creation lives within the framework of mathematical, scientific, spiritual and emotional fact - Precision and certainty in the fabric and framework of creation

Definition (What the principles are): The law shall be God's Truth - The law shall expose God's Truth and uphold God's Truth - The law is the spiritual, emotional, scientific and mathematical fact - The law is the fabric and framework of creation - The law enforces and compels truth

Objectives (Why the principles are applied to law): To ensure all creation experiences God's Truth - To ensure the human soul learns God's Truth - To provide a fixed framework for the operation of Love - To provide dependable and predictable law

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): Reveals God's great desire is for all of His creation to be in harmony with Truth - God's Truth is the framework for the expression of Love - God feels Truth and Love are indivisible

Examples (The principles' applications in law): Gravity: Is scientifically measurable and mathematically defined so that I can use the law with knowledge and certainty in my activities and life - Aerodynamics: The law defines the primary conditions for flight, and once understood, I can build a device which engages the facts in order to fly - Physical properties of elements & substances: All matter has individual characteristics and properties, and each element of the same kind will exhibit the same properties and react the same way under specific circumstances. Each substance of the same kind exhibits the same "truth" - Law of Attraction: Exposes to me the truth of my own condition by attracting circumstances and situations that expose the truth about my condition. Once I know my condition, I can see the causes for the events I attract - Physical illness in the human bodies: If I am ill, the truth principles in the Law of Compensation, the Law of Cause and Effect, and the Law of Attraction work together to expose that I am attempting to emotionally deny a truth about love (whether it be love of self, other half, others or the environment).

Conclusion - Truth principles: Are impossible for humans to understand without receiving God's Love - Ensure existence, harmony and predictability for all creation - Ensure fearlessness, security and safety for all creation - Are principles most frequently opposed and ignored by humans - Are the principles we have been teaching.

Questions About: Love Principles: What the principles are - Why the principles are applied to law - The creation and laws affected by the principles - What the principles reveal about God - Examples of the principles' applications in law.

Truth Principles: (the same)

Questions Answered (group: 20161105-1210): 00:15:19 Robert Griffiths: Does engaging

Forgiveness begin a chain of events correcting effects that I cannot personally correct? 00:37:23

Natalie Mann: Are God's Laws predictable to generate an emotion of trust in humans? 00:38:33

Natalie Mann: Comment regarding Laws of Gravity 00:43:58 Loise White: Why are Love & Truth the highest principles? 00:47:41 Diana Marshall: Are Love Principles naturally enforced and

compelled by the compensatory actions of God's Laws? 00:50:58 Diana Marshall: How do

principles work in the combination of laws? 00:52:02 Natalie Mann: Is only the human soul able to

experience God's Personal Love? 00:53:34: Deidre Amos: How is the objective "To ensure all creation experiences the expression of God's Love" possible if man kind destroys one of God's Creations? 00:55:48: Dave Robinson How does the law enforce and compel Love? 00:59:03: Dave Robinson Please compare human and God's motivation while enforcing laws? 01:00:35: Jane Stein: Is God's Truth a substance like God's Love that can be received into the human soul? 01:06:53: Jane Stein: What do you mean by the objective "God's Truth provides a fixed framework for the operation of Love"?

Questions Answered (group: 20161119-1210): 00:45:46 Eloisa Lytton-Hitchins: If "truth and love are enforced and compelled" do we get to a point where it feels impossible to do anything but love and be truthful? 00:48:40 Eloisa Lytton-Hitchins: Since those in their first incarnation have not developed love, when they act out of harmony with love, do they feel less pain? 00:51:02 Eloisa Lytton-Hitchins: You said "All creation demonstrates and facilitates the flow of God's Principled Love." Can you please explain what "Principled Love" is? 00:54:39 Eloisa Lytton-Hitchins: Is principled love more in line with God's Love and personal love more in line with natural love? 00:56:19 Karen Henry: How does non-living matter experience God's Love? 00:59:23 Questions Truth Principles 00:59:55 Nicky Primetica: Are the Truth Principles applied to law to lead us all ultimately to love and God's Love if we seek it? 01:03:19 Pierre Joseph: Can you explain how "God's Truth is the framework for the expression of love?" 01:05:22 Pierre Joseph: Can God measure love mathematically? 01:05:40 Pierre Joseph: Why is that Truth Principles seem easier to grasp and understand than Love Principles? Has it to do with our emotion of rebellion against love?

Life & Development Principles

Jesus briefly summarizes God's Principles of Life & Development that govern the operation of God's Laws, gives examples of the way these principles are built into God's Laws, and answers audience questions about the principles

Life Principles

Summary: Life principles transfer God's Life Force to each creation, principle and

law ensuring: Life energy from God to be given to living creatures - Life energy is transferred during pro-creation - Life is promoted, nurtured, respected and sustained - Imbalance is prevented and repaired - Matter that "dies" is transformed to promote life

Definition (What the principles are): The law shall allow God's Life Energy to enter creations - The law shall promote, nurture, respect, and sustain life - The law shall prevent and repair imbalance - The law shall transform death to promote life - The law shall allow for life to be given to creations

Objectives (Why the principles are applied to law): To ensure creation, life, survival and balance - To ensure matter will constantly change in order to support life - To ensure survival before engagement of higher laws is enabled by ensuring that knowledge of the higher law is obtained before using the law - To allow living creations to pro-create or replicate

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): God loves life and created life - God promotes, nurtures, respects, values and sustains life - God feels that life is precious and sacred - God wants us to know the higher laws before we use them

Examples (The principles' applications in law): Gravity: Creates an atmosphere, and prevents creatures requiring that atmosphere from leaving the atmosphere due to physical centrifugal forces. Aerodynamics: Requires knowledge (instinctual or obtained by investigation) of the law before flight can be obtained and prevents accidental engagement of the law without understanding principles - Compensation: Prevents the degradation of a soul to the point that the soul cannot sustain its own life - Earth systems: The earth's systems can maintain themselves and work to 'right' themselves (repair itself, regain equilibrium) even under extreme pressure (pollution etc) from other forces - Human bodies: The human body has millions of automatic inbuilt correcting, detoxifying and eliminating systems that enable us to maintain life even under severe hardship or physical and emotional strain.

Conclusion - Life principles: Allow any creation to receive God's Life Force and then be able to supply that life force through its own pro-creative ability. Life principles also ensure that life remains sacred and that all mechanisms are created to support and sustain life.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose life principles including: War, abortion, health care, eating meat, pollution, fear of emotions, fear of death, etc.

Development Principles

Summary: Development principles allow each creation, principle and law to evolve, grow and change positively ensuring: Expansive change is forced upon all matter - Growth is supported, encouraged and sustained - Positive development and evolution occurs for all matter - Increasing capacities can develop within all creation - Self-determination of the human soul

Definition (What the principles are): The law shall force expansive change upon all matter - The law shall enforce, support, encourage and sustain growth - The law shall support, encourage and sustain development and evolution - The law shall support adaptation to different environments

Objectives (Why the principles are applied to law): To ensure an enhanced condition of love develops over time - To ensure the entire universe and all creatures never remain stagnant - To ensure increasing capacities within all creation - To allow self-determination in the human - To allow life to adapt to harmful environments created by the human

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): God loves, desires and enjoys the growth and development of His creations - God has an expansive and generous nature - God is a parent who delights in the expansive growth and joy of the human - God values and encourages the development of all creatures - God is not motivated to punitively or arbitrarily restrict His Creations

Examples (The principles' applications in law): Gravity: Gravity's existence allows my investigation and development in all forms of endeavour while remaining safe and secure - Aerodynamics: Knowledge of the law allows enhanced forms of travel and experiences (i.e. growth and development in my ability to move around) - Human bodies: Sperm and egg. Woman's womb supports the environment of development. Allows reflexes and instinct to develop - Compensation: This law encourages me when I'm out of harmony with law to get into harmony with law by encouraging me to develop and change - Design and development of the universe: The entire universe allows positive and negative development, but supports and encourages positive development only - Transformation: The principle of development supports the complete transformation of the human into a different creature upon the reception of Divine Love.

Conclusion - Development principles: Allow any creation to develop and change by ensuring that the mechanisms for change and adaptation exist within the creation itself, and exist within the controlling laws. Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose development principles including: Being attached to the past, nostalgic, opposing release of emotions, opposing resolution of interpersonal issues, opposing changes of family and friends, opposing experimentation, placing financial matters ahead of development, resisting emotional recognition of personal truth, restricting children's natural curiosity and experimentation, controlling outcomes and attempting to reduce the consequence of choices, etc

Questions About: (same "type", as in other principles)

Questions Answered (group: 20161105-1350): 00:36:29 Patty Matthews: Does the Life Principle definition include life in the spirit and soul based forms? 00:41:34: Patty Matthews: Why does ageing and death occur in the physical body? 00:43:55 Patty Matthews: How does the soul cycle energy in the soul union state? 00:44:47 Patty Matthews: Can the soul in the aware union state form many spirit and physical bodies? 00:47:11: Inger Appelgren: Is the life energy one and the same for all living creatures? 00:47:17 Inger Appelgren: Does the life energy enter the human soul and other living creations? 00:48:45 Inger Appelgren: Does the life energy enter the human via the soul, and for animals via the spirit body? 00:50:36 Shula Davies: Does God's Life Energy enter the human during conception or is it passed down from parents? 00:53:37 Deidre Amos: With the objective "to

allow life to adapt to harmful environments" why is it that cockroaches can survive harmful environments? 00:55:45 Deidre Amos: Why are human attitudes towards God's creations so terrible? 00:56:56 Julie Cameron: Are the new laws constantly being created the work of God? 00:58:30 Julie Cameron. Is it possible for the life force to be removed from the human soul?

Questions Answered (group: 20161119-1350): 00:43:27 Kate Eckersall: Could you explain or give an example of how fear of emotions opposes Life Principles? 00:46:39 Mary: Example: How suppressing emotions or living in fear effects creation around us 00:47:48 Alice Rosenbloom: An example of the Law of Compensation given is that it prevents degradation of a soul to the point that the soul cannot sustain its own life. How is that accomplished? 00:53:12 Pierre Joseph: To be in harmony with Life Principles, should everything we create be self-maintaining and repairing? 00:57:25 Pierre Joseph: Does God supply us with His Life Force only at the time of our conception or all the time? If He stops, do we die? 01:01:56 David Raizman: So do you mean that the mechanisms for change though created within me only exist as a potential due to free will, and not an inbuilt function? 01:05:22 Fab Tolli: Does the Development Principle force change in all creation even if our desire is to avoid change? 01:08:50 Mary: Questions from 6th sphere spirit Without desire to change doesn't degradation automatically occur due to disharmony with Development? And isn't degradation a change and therefore in harmony with Development?

Economy & Function Principles

Economy Principles

Summary: Economy principles ensure that each creation and law economically uses resources by ensuring: The equal value of resources (time, matter and energy) - The economical use of resources to create function - The automation of laws and creations (no external maintenance) - Economy is incorporated within creation and law

Definition (What the principles are): The law shall consider time, matter and energy as resources of equal value - The law shall utilise all resources economically - The law shall be automatic and does not require external maintenance - The law shall be incorporated within the creation itself - The law shall benefit all creation

Objectives (Why the principles are applied to law): To ensure all resources combined are treated with equal value - To ensure all resources combined are utilised efficiently for abundance - To ensure all systems are sustaining, self-maintaining and self-repairing - To ensure the individual creature is supported by creation collectively - To ensure humans understand benefits of collective economy

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): God feels time, matter and energy are equally valuable - God feels economy and abundance are mutually inclusive - God feels economy results in abundance for all creatures - God's economy is not motivated by a feeling of lack - God feels that love does not waste anything (we can think about this in terms of physical creation but also in terms of emotional and spiritual experiences) - God focuses on the real benefit rather than any short term "satisfaction"

Examples (The principles' applications in law): Gravity: One law has the same benefit to all living creatures - Aerodynamics: Knowing the higher law results in more economical use of time, energy and resources to accomplish larger outcomes (particularly if we redesigned the vehicle to have more loving energy sources and operation would result in no roads or destruction to environment through transportation) - Automation: Instinct built into each living creature. Default operation built into all matter. e.g. Breathing; living organisms do not require decisions to breath – Decomposition: A decomposing tree creates fertile ground to sustain more life, food for insects, birds, animals and other living elements of the system, a pocket of light that allows smaller trees that were previously shaded to grow.

Conclusion - Economy principles: Ensure all laws and creations economically use, and treat of equal value, all resources of time, energy and matter. Economy principles ensure that no resource is wasted, and that abundance exists naturally within the universe.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose economy principles including: Placing financial matters ahead of time, matter and energy, creating without consideration for future resource usage, creating without concern for creatures that live afterwards, watering gardens, using chemicals that destroy, selfishly valuing my personal resources over the resources of others, etc.

Function Principles

Summary: Function principles ensure that each creation and law has many functional purposes by ensuring: The equal value of outcomes (results, beauty, and the use of resources of time, matter and energy) - Each law and creation has multiple functions that are automatically fulfilled - The economical use of resources to create multi-functionality - The automation of function and outcome - Creation itself instinctively "desires" to fulfil all outcomes

Definition (What the principles are): The law shall quantify the economical use of resources (time, matter and energy), the obtained results, and beauty as *outcomes* of equal value - The law shall ensure all *outcomes* are automatically fulfilled - The law shall ensure creation itself instinctively "desires" to fulfil all *outcomes*

Objectives (Why the principles are applied to law): To ensure all *outcomes* combined are treated with equal value - To ensure all *outcomes* combined are fulfilled - To ensure each creation itself fulfils all *outcomes* - To ensure each creation supports a system that fulfils all *outcomes*

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): God feels the only purpose of law is to create and enhance function – God sees no point in creating without function or for beauty only - God feels beauty is an inviolable part of loving function - God enjoys function and beauty as mutually inclusive - God creates function to inspire, satisfy, and increase the joy of the human soul

Examples (The principles' applications in law): Gravity: Gravity keeps all unconnected matter sustained within an atmosphere, and the atmosphere itself is sustained by gravity (along with other substances) – Aerodynamics: While only recently enjoyed by the human itself, birds and other creatures (insects, etc) have engaged flight that benefits humans (e.g. fly, ant, bee) collectively, and inspired humans (e.g. bird of prey) to learn the law – Trees: Trees have a multitude of functions, which include assisting survival and the creation of a usable atmosphere, habitat, heating, oxygen generation, removal of carbon dioxide, soil production, water management, as well as smelling good, supplying calming energy, and being beautiful to look at for humans - Every human specific law: Each human specific law has multiple functions of removing sin, causing transformation, as well as making the human itself feel, smell and look more beautiful.

Conclusion - Function principles: Ensure all laws and creations have multiple functional purposes for their creation and existence, and treat of equal value, all resources of time, energy and matter, and all outcomes including function and beauty - Function principles ensure that each creation has multiple purposes and that each purpose benefits other creations.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose function principles including: Not valuing resources (time, matter and energy), the obtained results, and beauty equally, creating without function, creating for a single function, destroying the environment to create, creating products that cover over truth (e.g. makeup for women), etc.

Questions About: (...as in other principles)

Questions Answered (group: 20161105-1510): 00:36:17 Deidre Amos: If God feels that time, matter and energy are equally valued why do we feel so much pressure about time? 00:40:40 Deidre Amos: Did God create night and day, but humans create time? 00:42:41 Jane Stein: Please explain how "God does not waste spiritual or emotional experiences" 00:48:12 Natalie Mann: Can you explain how Economy & Function is incorporated within the human? 00:50:03 Natalie Mann: Is it emotions that prevent us from seeing resources equally? 00:52:49 Patty Matthews: Does God consider art to be functional? 01:01:55 Loise White: Can music be functional? 01:03:34 Arvarna Lowe: Are there any penalties for creating things without loving function? 01:04:38 David Raizman: How is God able to achieve a high level of consistency in automation? 01:08:21 Felix

Hogel: What are considerations of making and using AI to have loving functionality? 01:09:53

Felix Hogel: Are you saying that creating a robot will always have a loving purpose?

Questions Answered (group: 20161119-1350): 00:03:13 Phoebe Bruce: Could you please explain how a law can be self-maintaining? 00:07:15 Phoebe Bruce: Once God creates the law is everything He sets up self-maintaining? 00:10:21 Luli Faber: Can you explain why time is of equal importance to energy and matter to God when God is an eternal being who has unlimited time? 00:13:34 Luli Faber: Is it possible to live in full harmony with Economy Principles on Earth? 00:15:21 Luli Faber: If someone become at-one with God, do they suddenly manifest a new home that is alive? 00:18:16 Luli Faber: Does God have a different definition of what is alive? 00:19:36 Karen Pronk: How can I waste an emotional or spiritual experience? 00:21:46 Karen Pronk: How can we determine beforehand which emotional experiences are wasting time? 00:25:24 Anna MacDonald: Does this mean a business run according to God's Principles will automatically be successful? 00:26:07 Anna MacDonald: What does business success look like from God's perspective? 00:30:05 Pierre Joseph: How did humans develop a feeling of lack in such an abundant universe? 00:32:59 Mary: Do we live in lack because we ignore truth and live in a state of fear? 00:34:24 Alice Rosenbloom: Can you please give an example of creating without function or for a single function and creating to serve multiple purposes? 00:46:18 Luli Faber: Can you give some examples of the instinctive desire that creation has to fulfil its outcomes? 00:50:48 Karen Henry: If our creations are not in harmony with the Function Principles are they then unloving and do God's Laws work to destroy them?

Permanence Principles

Summary: Permanence principles mean that all creation can rely on permanent

law by ensuring: Laws are unchangeable, consistent, permanent, and self-enforcing - Laws are structured, verifiable and mathematical - Laws are measurable, quantifiable and observable - Creation has safety and predictability in the universe

Definition (What the principles are): The law shall be unchangeable, consistent and permanent - The law shall be structured, verifiable and mathematical - The law's results shall be measurable, quantifiable and observable

Objectives (Why the principles are applied to law): To promote faith & trust in the Creator, Love, Truth, the environment & life - To create stability and predictability in God's Universe - To promote discovery, experimentation, education & learning - To prevent negotiation, manipulation, and intentional misuse of the law - To allow intelligent creatures to consistently and reliably create - To enable discovery of individual truths via a large variety of fields of enquiry

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): God's Love & Truth is consistent and permanent, verifiable & unchangeable - God feels that Love must be consistent and permanent - God desires humans to discover truth through their desires - God is fixed and unmovable, unable to be manipulated, lied to or fooled - God feels the same for all creations of the same type - God wants to be trusted

Examples (The principles' applications in law): Gravity: Gravity is consistent for the environment which allows for my security and safety in taking actions with predictability.– Aerodynamics: The higher law, once known and understood, can be reliably, consistently, mathematically, safely and securely engaged– Fibonacci numbers in nature: As an artist (proportion, people, placement of objects, etc) - As a scientist (rotation of leaf placement photosynthesis efficiency etc) - As a cosmologist (design of galaxies, efficient distribution of energy) - As a marine biologist (efficient design and strength of living space – shells) - As a botanist (design of plants etc) / Cause and effect: Every effect of the same kind has the same cause - Human soul: Changes in my soul are measurable and repeatable

Conclusion - Permanence principles: Ensure all laws are unchangeable, consistent, permanent, and self-enforcing and that creations can rely upon this fact. Permanence principles ensure that all creations of the same type function in the same manner so that function is certain.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose permanence principles including: suggesting that love varies itself under different circumstances - believing all law is a "process of negotiation" - believing I can manipulate the law - feeling if no one is watching then laws are not enforced - feeling that I have a "special case or circumstance" to avoid law - believing that only actions can be governed - believing that superiority absolves me of certain law - believing that circumstances dictate whether to obey law - believing that financial considerations allow for disobedience - believing freedom means being able to ignore or break law - resisting growing faith based upon previous experience - suggesting that there is no such thing as absolute truth, etc

Fields of Enquiry Diagram: Circle with "fact", towards it are arrows from these different words: Science, Truth, Maths, Music, Metaphysics, Art, History, Personal experience, Love

Permanence Comparison (table):

<u>God's Concept</u>	<u>Human Concept</u>
God never varies the operation of Love under any circumstance	Humans suggests that love varies itself under different circumstances
God's Laws cannot be negotiated with and are always consistently enforced	Humans believe all law is a "process of negotiation" with the law enforcer
God's Laws cannot be manipulated or appealed to	Humans believe they can manipulate the law enforcer
God's Laws are self-enforcing and always observe the attitudes, feelings & actions	Humans feel if no one is watching, then laws are not enforced
God's Laws always operate and the effect is guaranteed in all circumstance	Humans feel that they have a "special case or circumstance" to avoid law
God's Laws operate upon the attitude & feeling and action of the individual	Humans believe that only actions should be governed
God's Laws operate without partiality, and absolve no-one	Humans believe that superiority absolves them of certain law
God's Laws require obedience in all circumstances	Humans believe that circumstances dictate whether to obey law
God's Laws do not consider financial circumstances at all	Humans believe that financial considerations allow for disobedience
God's Laws cannot be ignored and state that true freedom for all requires living in harmony with the laws of Love	Humans believe freedom means being able to ignore or break law

Questions About: (...as in other principles)

Questions Answered (group: 20161106-1100): Questions Answered

00:52:25 David Ryan. The Development Principles say laws develop, but Permanence Principles say laws are unchangeable. Can you please clarify? 00:55:42 Felix Hogel: If the human creates in harmony with God's Principles, is the creation always permanent? 00:56:38 Christine Thorley: How do God's Laws operate on human soul attitudes, thoughts, emotions and actions? 01:01:38 Christine Thorley: Are all laws expressed by mathematical equations? 01:04:26 Natalie Mann: Asks a question that Jesus dismisses as selfish 01:04:48 Natalie Mann: Does every effect of the same kind have the same cause in all circumstances? 01:05:06 Natalie Mann: Can doctors who do not believe in God find the true causes of problems? 01:06:37 Natalie Mann: Are scientists prevented from discovering absolute truth?

Questions Answered (group: 20161120-1220): 00:09:40 Fab Tolli. This principle applies to every one of God's Creations. Can you please give examples with things that can't be seen like frequencies and sound waves? 00:15:44 Wayne Shaw: Can the law's results be measured, quantified, and observed with our current knowledge of maths? 00:21:04 Laura Tolli: So how can a spirit or person tell that we have released an emotion? 00:25:10 Phoebe Bruce: If God feels love is permanent, is it

possible for a human to love someone or thing and stop, or does that mean they never loved them in the first place? 00:27:00 Phoebe Bruce: Is it possible for human to love something then stop? 00:28:36 Eloisa Lytton-Hitchins: If "God desires humans to discover truth through their desires", how does this relate to consistency? 00:29:44 Eloisa Lytton-Hitchins: So the law is permanent but my desire is the thing that comes and goes? 00:30:49 Eloisa Lytton-Hitchins: So does a strong more consistent desire cause us to live in more harmony with Permanence? 00:31:22 Eloisa Lytton-Hitchins: Could you please explain more about will (current soul state) and desire (aspired to future state) and how that effects future events? 00:32:24 Kerry Foley: Does every effect of the same kind have the exact same cause, the same unloving action and/or suppressed emotion in every single person? 00:35:31 Kerry Foley: So with the example of different shoulder injuries, do they all have different causes? 00:36:04 Luli Faber: How do Permanence Principles fit with the fact that new laws are being created all the time? 00:39:23 Sandra Tuszynska: What is true obedience and is it possible to obey God's Laws without having received God's Love? Can we obey without understanding in our soul? 00:42:05 Sandra Tuszynska: So did God know that humans would create the mobile phone? 00:43:57 Sandra Tuszynska: So we are often not aware that we are obeying laws even when we are? 00:45:04 Patricia Sanders: How do the Permanence Principles apply to our souls since obviously our soul does change?

Human Law Comparison

Reasons For Comparing Human Law with God's Laws

My personal pain: Since childhood I have been exposed only to parent and societal law - I have now developed attitudes towards law that come from the childhood experience - I have attitudes to God's Law which cause me much heartache and pain - I have the same attitude towards God's Laws that I have towards human law - I need to examine my attitude to God's Laws if I wish to become happy

Comparison allows me to examine problematic soul based issues: If I compare God's Laws and human law, I have a chance to identify my own soul based emotional injuries which prevent me from engaging God's Laws

God's Laws	Human Laws
1- The law maker is also the law enforcer and fully enforces obedience to every law	1- The law maker is usually not the law enforcer or policing officer, and the law enforcer is not able to fully enforce obedience to any law created
2- The law maker and enforcer is infinitely and always aware, perfect and infallible	2- The law maker and/or law enforcers have little awareness, are able to fail, and are imperfect
3- Laws are created by the law maker only to benefit all creation	3- Laws created with mixed and often unpredictable benefits, sometimes for the benefit of all creatures, or only for the benefit of the human, the law maker, the law enforcer or the police
4- Laws created to maintain survivability, growth, and transformation of all matter and living creatures within the Universe	4- Laws primarily created for the purpose of being a deterrent and to enforce punishment upon the law breaker and to discourage the most disobedient
5- Laws operate whether the creation is aware or not	5- Laws operate only if the law enforcer is aware and willing to enforce the law
6- Laws operate on the "heart", soul, attitude, character, thoughts and emotions of the human, and the action taken	6- Laws operate only on the action taken, and then only if the action is observed, processed and enforced, by the law enforcer

7- Laws operate consistently under all circumstances with no exceptions	7- Laws operate differently in each country and are inconsistently applied according to wealth, social status or position, race, gender, nationality, and hundreds of other variable factors
8- Each law has loving penalties if disobeyed, and loving rewards when obeyed	8- Each law usually only has penalties when disobeyed, and then only if disobedience is observed, processed and enforced, by the law enforcer
9- The penalties and rewards are loving, consistent and predictable	9- Many penalties are unloving. Obedience is rarely rewarded. The results are usually unpredictable.
10- Each law deals with and addresses both the cause (relating to why the human used their will to disobey or obey the law) and the effect (the fact that the human did so use their will in a loving or unloving manner)	10- Law only deals with disobedience, and then does not fully address the effect but rather only provides "punishment" or "penalties" to act as a deterrent to further disobedience and force obedience. Does not address the cause of any action, and does not reward loving action.

Results: Comparing God's Laws with human law reveals: humans are "drunk" on their own perception of law - humans see God's Law similarly to how they see human law - humans impose their perception of human laws on God's Laws - humans create a huge amount of pain and suffering as a result of the "Human law Hangover"

Human attitude to law is compromised because humans: are not able to fully enforce obedience to any law created - have little awareness, are able to fail, and are imperfect - create laws with mixed and often unpredictable benefits - create laws for the purpose of being a deterrent and to enforce punishment - must observe disobedience and be willing to enforce the law - only penalize disobedient actions, and then only if the action is noticed by, caught by and willing to be enforced by other humans - create laws that operate differently in each country and are inconsistently applied - according hundreds of variable factors - create laws with unloving penalties, obedience is rarely rewarded and the results are usually unpredictable - create law that only deals with disobedience, and then does not fully address the effect but rather only provides "punishment" or "penalties" to act as a deterrent

We will discuss the "Human law Hangover" and how this affects every person in attendance

Summary: Human law comparison reveals: God's Laws are very different to human laws - Human resistance to God's Law is based upon the flawed viewpoints of love and truth that come from childhood parental and societal experiences - If I keep treating God's Laws like human laws I will continue to remain unhappy and in pain

Questions Answered (group: 20161106-1220): 00:13:36 Jadda Jessop: Is there a point for human laws to exist when God's Laws are operating constantly anyway? 00:16:19 Yvonne Joy Harris: Can I emotionally dissociate my parents from God to stop putting my law hangover onto God? 00:27:13 Carol Parrett: How do we make our way around human law while obeying God's Laws? 00:30:08 Mary: Example: Breaking God's Laws, ethics and morality in order to "uphold" one of God's Laws 00:32:34 Dave Robinson: Is the penalty the same for the same kind of unloving thought and unloving action? 00:35:08 Dave Robinson: What are the rewards for obeying God's Laws? 00:40:49 Amber Love: Jesus dismisses interaction due to Amber making comments 00:41:14 Anna Skevik: How does God know everything about every human soul? 00:47:07 Felix Hogel: What is an example of God's Law addressing the effect of breaking or obeying the law? 00:48:10 Felix Hogel: Must I rely on God to address the all effects of my breaking of God's Laws? 00:48:43 Felix Hogel: Is repentance about me addressing the causes of my actions? 00:49:05 Raj Miles: Is there a collective community or national penalty aspect for breaking God's Laws?

00:49:58 Raj Miles: How are penalties applied to the community when agreeing to break God's Law? 00:50:34 Raj Miles: Can a whole community encounter a similar penalty for the breaking of God's Law? 00:51:15 Spirits through Mary: Is every community that experiences a great deal of pain and suffering experiencing a penalty? 00:52:39 Spirits through Mary: What happens to the communities and countries that sin a lot but still live in relative comfort? 00:54:55 Sherry Webster: What should we do if there is a conflict between God's Laws and human law? 00:56:15 Jennifer Heibloem: Can I ease the penalty of law by expressing gratitude or being of service?
Questions Answered (group: 20161120-1525): 00:28:41 Sandra Tuszynska: I am not noticing any rewards for "good deeds" on earth but it seems that in the spirit world rewards appear faster? 00:30:42 Sandra Tuszynska: How do we feel God's Rewards for "good deeds" while on earth?

Scope Principles

Terms:

- **Creation** includes any matter or creature from the smallest particle to the most complex living creation of the human soul
- **Energy** includes information, energy, emotion, thought, communication, relationship or interplay within or between creation
- **Properties** include all properties, characteristics, attributes, attractions, and restrictions of the creation itself
- **Inbuilt Rules** means a set of laws and potentials built into the creation itself that govern the creation's properties and energy
- **External Rules** means a set of laws and potentials created by creation combinations external to the individual creation itself that affect the creation's properties and energy

Summary: Scope principles guarantee creation is governed by law, and that new creations and laws can exist, by ensuring: Inbuilt rules are placed within each creation (e.g. genetics) - Inbuilt rules determine the creation's potentials, energy flow and properties - External rules affect each creation's properties and energy - External rules allow for expansion of each creation's properties and energy - External rules allow for new laws and creations - External rules control the flow of energy between creations

Definition (What the principles are):

All creation shall be governed by law - Inbuilt rules shall be inbuilt into each creation - Inbuilt rules shall determine the creation's potentials - Inbuilt rules determine the energy flow and properties of the creation - New inbuilt rules are created when combined creations form a new creation - New inbuilt rules determine the energy flow and properties of the new creation - The energy flow shall be governed by inbuilt rules and external rules

Objectives (Why the principles are applied to law): To allow for the Universe to exist - To allow for simple and complex non-living and living creations to exist - To allow for energy flow between creations - To ensure that no creation is capable of anarchy - To allow for automation of processes, functions, properties and life

To allow for infinite combinations and permutations of:

creation – new forms of creation - evolution and devolution - new inbuilt and external rules

To create and allow for:

self-enforcing law - self-maintaining law - new higher laws - external rules governing all creation - internal rules governing individual creation - properties for each individual creation combination

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): God is extremely intelligent -

God is a careful planner and designer - God is interested in allowing creation to communicate & gain knowledge - God wanted mutually beneficial relationships between various creations - God wanted no creation to exist independently - God wanted potentials to be governed by the creation itself - God made provisions for all new creations and laws - God wanted a self-maintaining Universe - God wanted no creation to experience complete separation from God - God wanted all devolution to result in further creation

Examples (The principles' applications in law): **Gravity**: Gravity is not actually a single law or phenomenon. As a law it is actually a combination of creations and laws which, when combined make a higher law. - **Aerodynamics**: Aerodynamics is not actually a single law or phenomenon. As a law it is actually a combination of creations and laws which, when combined, make a higher law. It also involves many lower laws from a wide range of fields. - **Human bodies**: A combination of laws and substances, which include the flow of energy system (life), made from a combination of elements (which are governed by their own laws), made from a combination of atomic and sub-atomic particles (which also are governed by their own laws), which are made from a specific combination of particles (themselves also governed by specific laws). In addition, some external creations (such as viruses, and bacteria) which exist as separate organisms governed by their own laws, exist within the body. Also, the body communicates with the controlling soul and spirit body through a set of laws, and has the potential to communicate with anything in the rest of the Universe through another set of external laws. Each system within the body is also governed by its own set of laws but these, in a healthy system, work harmoniously to complete the whole creation and function of the human body.

Conclusion: Scope principles: Determine the existence of the universe itself, everything within the universe, how everything communicates with all elements of the universe, how new creations and laws appear in the universe, and also the inbuilt soul based mechanisms via which the highest creation within the Universe is able to communicate with God.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose scope principles including: Creating objects and systems that work against the environment and require maintenance - Creating without understanding the laws governing the constituent elements of the creation (e.g. chemical genetic manipulation, anti-bacterial or viral medication etc) - Creating 'medicines', 'solutions' or 'remedies' that deal only with effects (and don't consider the scope of what is occurring and why a 'symptom' exists) - Attempting to overcome or interact with a single law, or the effect of a single law, without considering the other laws that operate in unison with that law, etc

Questions About: (...as in other principles)

Questions Answered (group: 20161106-1350): 00:21:04 Alan Atkinson: Can human experiments change how God's Laws operate on the human body? 00:21:36 Alan Atkinson: Would people affected by human experiments have to deal with specific emotions? 00:28:42 Sherry Webster: Does the soul have a genetic structure? 00:29:00 Sherry Webster: Can human soul grow bigger than what it was initially designed? 00:29:48 Sherry Webster: Does spirit body have a different genetic code to a physical body? 00:30:29 Sherry Webster: Is the spirit body more perfect than the physical body? 00:31:29 Sherry Webster: At the moment of conception are the soul, physical and spirit bodies all perfect creations? 00:32:17 Jennifer Heibloem: How does God's Love affect the human soul and bodies? 00:34:59 Patty Matthews: What creations does the Scope Principle effect? 00:36:40 Shula Davies: Can the human soul expand without God's Love? 00:41:13 Felix Hogel: Do Scope Principles limit the chaos that humans attempt to create? 00:45:57 Hunter Lydon: As the human soul progresses do our inbuilt rules change? 00:48:17 Patty Matthews: Is Scope an infinite nest of concentric circles that is all creation? 00:52:42 Patty Matthews: Since God's Soul is an energy measuring system, do the Laws track all of the energy? 00:54:29 Tristan Miller: Are the Scope Principles what we will need to learn in order to create new things? 00:56:49 Denis Langmead: Do chemical reactions happen inside of our bodies when we choose to sin? 00:58:00 Bruce Carrigan: Are genetic imperfections held in the soul? 00:59:44 Bruce Carrigan: Can a child while in the human body correct their genetic imperfections? 01:02:43 Robert Griffiths: Is the soul able to devolve and what happens when it does?

Questions Answered (group: 20161120-1400): 00:09:07 Barbara McNair: If there is no atmosphere can we still talk and listen? 00:11:19 Laura Diaz: Does the spirit world have its own atmosphere? 00:11:41 Fabio Tolli: Can the external rules change like inbuilt rules change? 00:13:46 Rachael Bush: Do we collectively create a spiritual atmosphere that allows information to pass through it? 00:15:53 Mary: Are you saying that there are external rules that govern how energy

mixes and creates a spiritual atmosphere? 00:17:06 Neil Henderson: Are there the same elements in the spirit world as there are in the physical? 00:18:24 Neil Henderson: Are there going to be more elements discovered in periodic table or is it finite? 00:21:15 Neil Henderson: Do Scope Principles limit the integration between creations? 00:37:53 Maximilian Ferraiuolo: Are you saying that the combined lower laws create the new higher law? 00:39:07 Sandra Tuszynska: Are we recycled and contain particles from dinosaurs and other people? 00:40:49 Alwyn Campbell: How do internal and external laws effect devolution? 00:47:51 Alex Mrnak: Isn't Scope the same as potential? 00:48:49 Karen Henry: Can you please help me with the external rules definition? 00:50:59 Karen Henry Could you explain what you mean by "energy flow" in the context of inbuilt rules? 00:52:55 Sandra Tuszynska: When you say "God made provisions for all creation and laws" does this mean God foresees all potentialities and that God can never be surprised? 00:53:37 Sandra Tuszynska: Is God omnipotent? 00:54:21 Sandra Tuszynska: Can God be surprised? 00:55:31 Laurleen Lee: Is it the external rules that allow for the evolution of life forms? 00:55:37 Laurleen Lee: Does evolution of life forms exemplify to the human how we can change into the Divine Angel? 00:58:56 Denise Shaw: In regards to when new creations occur in the Universe (e.g. a new sphere) do Scope Principles determine the new creation and the Laws pertaining to the environment? 01:01:11 Patricia Sanders: Are there laws that apply only specifically to each of us as individuals (e.g. only me or only you)? 01:04:20 Patricia Sanders: Do hydrogen and oxygen being different elements have different internal and external laws that apply to them? 01:05:50 Luli Faber: How is it that internal and external rules allow for a new law or creation? e.g. with water 01:08:00 Richard Turner: What are some examples of soul based mechanisms that allow humans to communicate with God?

Homework For the "Foundation Principles" session

How am I living in or out of harmony with each of the Foundation Principles?

Conclusion: Foundation Principles form the foundation of the universe itself, and also allow us to obtain some basic facts about God and God's Personality, Nature, Attributes, Characteristics and Desires.

Questions Answered (group 1): 00:39:53 Jesus: Examine the Economy Principle in perspective of time, matter and energy rather than money 00:41:11 Felix Hogel: Does the homework include reflecting on the effects of when I did not live by God's Principles? 00:43:52 Jesus: Examine the soul based inbuilt rules and how we break them 00:45:48 Jesus: Explains the purpose of the homework is to see exactly where and how we sin. **Group 2:** 00:23:14 Laura Tolli: Could you please give some examples of the homework for Scope Principles? 00:26:10 Joanne Ramundo: Could you please give an example of the inbuilt and external rules in Scope Principles homework? 00:28:36 Karen Pronk: What do you mean by "spiritual examples"?

Introducing Order Principles

Brief summary of the next session

Presentations pertain primarily to the Laws governing the human soul itself - The "Order Principles" session discusses some of the principles that determine the Laws associated with how the human soul FITS INTO the Universe

Summary: Order Principles form the foundation for the principles that govern the potentials of the human soul (covered in the "Human Soul Principles" session) - The Order Principles session will address how the human soul and other creations fit into the universe itself

God's Universe diagram (see above)

Order Principles session: How the human soul fits into the Universe - How the human soul affects the Universe itself - How the human soul affects the lower creations within the Universe - What role the human soul has within the Universe

Order Principles definitions: Human will: The human has been given the gift of free will -

Many gifts and responsibilities pertain to the use of the gift of free will - Many principles apply to the human soul because it has the gift of free will - Principles presented in this session have a direct impact upon the human soul

Self-responsibility: Self-Responsibility is the Law based requirement of self-awareness, to seek truth, love and understanding of all principles of Love and Law, and the loving ownership and expression of one's will, desire, passion, emotion, attitudes, intentions, thoughts and actions in harmony with God's Principles and Laws.

Order principles (current session): Hierarchy, Governance, Responsibility, Compensation

Soul specific principles (the final session): Will, Desire, Redemption, Transformation

Hierarchy: There is a hierarchy of Laws and a hierarchy of creations within the Universe. Jesus will outline and discuss how these two hierarchies are inseparable, conjoined and inter-related, and built upon the foundation of Scope principles. Hierarchy principles apply to all creation. Governance: Since humans have been given power over all other creation (whether that is just a potential or realized) and the potential to create, humans are also bound to additional laws regarding the governance of other creations. Responsibility: Since humans have been given power over all other creation (whether that is just a potential or realized), and they have the ability to use their will and make choices and decisions affecting other creations, humans also have been made responsible for the way in which governance is exercised. Compensation: Since humans must choose to take actions in or out of harmony with Love, and such actions potentially affect other humans and other creations, humans are compensated for loving actions, and penalized and corrected for unloving actions.

Questions Answered (only in group 1): 00:18:36 Rita Hogel: When you discuss the human soul do you mean the complete soul?

Hierarchy Principles

Terms:

- **Creation** includes any matter or creature from the smallest particle to the most complex living creation of the human soul
- **Components** are creations of less complexity combined in new ways - Any lower creation is a potential component for a higher creation
- **Energy** includes information, energy, emotion, thought, communication, relationship or interplay within or between creation
- **Properties** include all properties, characteristics, attributes, attractions, and restrictions of the creation itself

Note: Each creation's complexity is determined by the complexity of its individual components, energy and properties - Each creation of higher complexity has higher energy capabilities - If a creation has higher complexity and energy capabilities, it is also considered to be higher in hierarchy

- **Inbuilt Rules** means a set of laws and potentials built into the creation itself that govern the creation's properties

- **External Rules** means a set of laws and potentials created by creation combinations external to the individual creation itself

Rule set is the combination and interaction of inbuilt and external rules

Law is an individual set of laws or an individual rule set - Each more complex creation has more complex inbuilt rules - More complex inbuilt rules interact with more complex external rules and therefore create more complex laws

Context (Help to understand): **Scope** determines the existence of the Universe, everything within the Universe, how everything communicates with all elements of the Universe, and also the inbuilt soul based mechanisms via which the highest creation within the Universe is able to communicate with God

Hierarchy determines the position or place of each creation and law within the Universe, and the power and energy each creation or law has over other creations and laws lower in the hierarchy.

Summary: Hierarchy principles: Determine the hierarchy of law by the complexity of each law - Determine the hierarchy of creation by the complexity of each creation - Ensure more complex creation is governed by more complex laws - Ensure higher creations and laws exert more power, have more energy, and more complex properties

Definition (What the principles are): The Hierarchy of creation shall be determined by each creation's complexity - The Hierarchy of law shall be determined by the complexity of each law - Each more complex creation in the hierarchy of creations shall be governed by a hierarchy of more complex laws - To ensure that creations and laws that are higher in hierarchy exert more power and have more complex properties

Objectives (Why the principles are applied to law): To ensure each creation is governed by law - To ensure all matter can be broken down into its individual components - To prevent the complete destruction of any form of matter - To allow for the creation of more complex law - To allow for the creation and survival of more complex creations - To allow creations of higher complexity to contain more complex inbuilt rules - To allow for each more complex individual law to more powerfully affect creations of higher complexity - To allow for each more complex individual creation to have a more powerful energy flow and effect on creations of lower complexity - To allow for each more complex individual law to have a more powerful effect on laws of lower complexity - To create implied, instinctual or automatic governance, responsibility and compensatory systems which are not based upon will or desire but rather upon hierarchy

Application (The creation and laws affected): Every law - All matter living and non-living

Reveals (What the principles reveal about God): God desires His creations to have the ability to create - God is generous and sharing in His Nature - God desires that each creation lives in relationship with other creations - God feels that relationships are important and bring satisfaction of desires - God creates instinct in all creatures for common functions - God creates properties in all matter for common functions - God feels that common purpose brings more powerful beneficial results - God feels each creation component has value and is necessary and essential for the operation of the whole

Examples (The principles' applications in law): **Gravity:** Gravity is actually a combination of creations (matter) and laws (rule sets) creating a new law we call gravity. The greater the mass the greater gravitational force is exerted on other matter. This creates a law that maintains automatic safety for sustained life and development. **Aerodynamics:** Aerodynamics is actually a combination of creations (matter) and laws (rule sets) creating a new law we call aerodynamics. It involves many lower laws from a wide range of fields including physics of motion, material properties, fluid dynamics, pressures and temperatures and so forth. **Human bodies:** Hydrogen and oxygen, water, blood, cardiovascular systems, energy systems, human body discussion and example of creations of law and new law interactions with the environment and the injection of the life principle. **Human soul:** Connection with physical body (most complex physical creation) - Connection with spirit body (most complex spirit based creation). The human soul energy systems and receiving substances from God [*sic*].

Conclusion: Hierarchy principles: Hierarchy determines the position or place of each creation and law within the Universe and creates implied, instinctual or automatic governance, responsibility and compensatory systems. Hierarchy extends the Scope principles by placing Scope within a Hierarchical system. Scope allows for Hierarchy to exist.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose hierarchy principles including: Feeling and believing I individually and humans collectively do not have control over our own creations (e.g. sin, disease, sickness, accidents etc) - Feeling and believing I can circumvent or am more powerful than the laws that govern me, etc.

Questions About: (...as in other principles)

Questions Answered (group 1): 00:39:06 Natalie Mann: Does the spirit world exist in the physical universe? 00:40:00 Natalie Mann: Does the soul control the physical and spirit bodies? 00:48:12 David Raizman: As I develop and transform with God's Laws do I have a greater impact on untransformed souls? 00:54:48 Loise White: Why does God not want the human soul to become as

powerful and wise as God is? 00:57:00 David Ryan: Is creation divided into groups or is it a long list where one creation is above and below another until the human soul is at the top? 00:58:01 David Ryan: How is creation grouped together? 00:58:52 David Ryan: Is there an infinite amount of hierarchy in the system? 01:01:50 Anna Skevik: What is the difference between a rule set and a law? 01:02:53 Anna Skevik: Is there a synonym for the word "Scope"? 01:03:51 Anna Neynens: How do Hierarchy Principles reveal that God feels relationships are important and bring satisfaction of desires? 01:09:23 Anna Neynens: How do Hierarchy Principles reveal that God feels common purpose brings more powerful beneficial results? 01:11:31 Jane Stein: What are the results of the human soul abdicating its role in the hierarchy of creation and having the false belief that other creations are higher?

Questions Answered (group 2): 00:23:36 Fab Tolli: Can you please explain further what you mean by "more complex individual creations have more powerful energy flow effects on creations of lower complexity"? 00:25:52 Fab Tolli: Does that mean that temperature is of higher complexity than water, so therefore is higher in Hierarchy? 00:27:21 Hunter Lydon: Do we unknowingly help create new laws? 00:29:46 Phoebe Bruce: What makes one law more complex than another? 00:30:33 Wayne Shaw: God allows us to create so He created laws that allow GMO foods to exist. Have laws been created that will eventually destroy the GMO foods? 00:36:38 Paige Willoughby: One objective is "to create implied, instinctual, or automatic governance, responsibility and compensatory systems which are not based on will as desire, but rather upon hierarchy"? Why has God not included will and desire? 00:38:11 Claudia Vandenameele: What do you mean by implied governance? 00:43:16 Denise Shaw: In regards to the spheres and those in them, is it true to say they are governed by principles and laws greater than those in the lower spheres? 00:44:22 Denise Shaw: Is it true those in the higher spheres have greater scope than those in lower spheres but those in lower spheres have the potential to develop which displays God's Great Love for all? 00:45:10 Denise Shaw: So can developed spirits communicate with people in the lower condition but not the other way around? 00:46:39 Nicky Primetica: Do Hierarchy Principles allow for the workings of the Law of Repentance to supersede the correction-based workings of the Law of Compensation? 00:50:43 Karen Pronk: Since any lower creation is a potential component for a higher creation, does that imply that in the future the human soul could be merged/transformed into something greater (but still within God)? 00:52:22 Karen Pronk: Is an example of the Hierarchy Principle that the two spirit halves merge to produce soul union? 00:53:55 Sheridan Coy: Are laws that are higher in hierarchy more based on will? e.g. Law of Repentance & Forgiveness compared to the Law of Compensation 00:56:06 Sheridan Coy: Do you mean that my desire is higher in hierarchy than will? 00:57:18 David Raizman: How do Hierarchy Principles prevent the complete destruction of matter? 01:01:25 David Raizman: How does a higher law have an effect on a law of lower complexity? 01:07:01 Jesus for Luli Faber: Why is it important for more complex laws and creations to have more power than less complex laws and creations? 01:09:31 Alwyn Campbell: Is the Permanence Principle a part of the Hierarchy Principle? 01:12:27 Rebecca Johnstone: Is it possible to discover what elemental parts make up God's Love so we can learn more about God? 01:14:12 Rebecca Johnstone: In your 2000 years have you been able to understand what God's Love is?

Governance Principles

Terms: Governance principles will be discussed in relation to self-aware beings with free will. Other beings are controlled by Governance principles but the control is instinctual rather than will based. The human soul (not the body or spirit body) is a self-aware being with the ability to express free will depending on development.

Energy includes information, energy, emotion, thought, communication, relationship or interplay within or between creation

Development increases in quality and capacity as the human soul lives in more harmony with God's Principles, and decreases as the human soul lives in less harmony with God's Principles

Power of governance is the energy able to be expressed by the human soul which varies in quality and capacity in direct relationship to development

Summary: Governance principles ensure: Everything is under God's Authority - God's Laws control and govern all of creation - God's Laws allow human souls to share governance - Each human soul automatically governs, but the power of governance is determined by development

Definition (What the principles are): God's nature, character, attributes, desires & personality determine God's Principles - God's Principles determine God's Laws - God's Laws shall control and govern all of creation - God's Laws allow all human souls to share governance - Each human soul automatically governs, but the power to govern is determined by development

Objectives (Why the principles are applied to law): To ensure that God has ultimate and complete authority - To allow God's highest creation (the human soul) to share in governance - To gift to the human soul the ability to control its external environment based upon the human soul's development (positively or negatively) - To ensure the human soul becomes educated in the effects of the use of power - To give more power to those in higher development - To restrict the power of those in lower development - To allow the human soul to create independently of God - To ensure creations of the human soul that are out of harmony with God's Principles are eventually destroyed

Application (The creation and laws affected): All law - All matter living and non-living - Specific laws pertaining to the human soul - Specific laws governing the creations of the human soul

Reveals (What the principles reveal about God): God takes full responsibility for God's Creations - God entrusts Her highest creation to govern in harmony with God - God desires the highest creation to share Her Joy of creating - God gifted to Her highest creation the potential of greater power over the environment by giving them the potential to develop - God educates the highest creation in the loving use of power - God loves giving and sharing power - God makes provision for the human soul being repentant and changing

Examples (The principles' applications in law): **Gravity and Aerodynamics**: The human body is governed by gravity unless it learns of a higher law (aerodynamics) which can overcome gravity. The process of learning enables the human soul to develop more knowledge which then allows using different laws to overcome the limitations of gravity. The human soul creates a device using current known laws to benefit itself. **Law of Attraction**: The human soul automatically governs via the soul's developed condition. The condition controls substances, creatures and events in harmony with the law so that the soul attracts these resources to aid in exposing to itself its current developed condition. The governance principle ensures these attractions occur to aid the soul in its own self-awareness. **Environmental responses**: The soul is like a transmitting antenna sending to its environment its own governance condition (developed soul condition). Each external creation responds individually and collectively, to the individual and collective soul condition of the human. Humans individually and collectively make decisions and choices either in or out of harmony with Love (thoughts, emotions, and actions) based upon condition. This improves balance or creates imbalance in the environment and the results can be measured. **Human bodies**: Each system within the body is also governed by its own set of laws. In a healthy person the governing system works harmoniously to complete the healthy creation and function of the bodies.

Conclusion: Governance principles: Ensure that God has authority over all Principles, Laws and Creations, but that each creation with free will and self-awareness does automatically, and can with education and knowledge, affect and control the positive or negative development of its environment

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose governance principles including: Not taking control of their own creations external to and within their own bodies (e.g. sin, disease, sickness, accidents etc) - Desiring authority and power without love or development - Creating without the ability to govern - Denying the effect of their governance over other creatures upon those creatures, etc

Questions About: (...as in other principles)

Questions Answered (group 1): 00:16:53 Jennifer Heibloem: By development do you mean the ability to learn or experience? 00:17:58 Jennifer Heibloem: Is learning different to what you

experience? 00:37:58 Jane Stein: An objective of the Governance Principle is to ensure that creations of the human soul out of harmony with God's Principles are eventually destroyed, can you give some examples? 00:39:51 Jadda Jessop: If Governance Principles ensure restriction of those in lower development, why do evil people seem to be in power on Earth? 00:43:02 Mary: Is power that comes from giving away will limited in its expression? 00:44:55 Jadda Jessop: Do God's Laws apply to desires and not just actions because God knows we usually act upon desires? 00:47:39 Gabee Poly: Do people degrade in their condition if they give or receive unloving power? 00:49:19 Natalie Mann: When people give energy to others does this make others more powerful? 00:51:52 Sherry Webster: Is there any inbuilt restriction from God on our scientific discovery and knowledge? 00:53:41 Sherry Webster: If Amon and Aman did not turn away from God would humanity be in much more developed condition now? 00:55:19 Deidre Amos: Why is it so hard to fathom that God loves giving and sharing power? 00:56:43 Yvonne Joy Harris: How does God give more power to those in higher development and restrict power to those in lower development? 00:58:04 David Raizman: If we have Governance over God's Creations can we impact animals to the point where they no longer honour their inbuilt rules? 01:00:40 David Raizman: Can we degrade to the condition where we can no longer impact other things in an unloving way? 01:04:55 Mary: Do we still have governance over lower creations no matter how much we degrade in development? 01:05:40 Mary: When souls join together can they appear more powerful?

Questions Answered (group 2): 00:12:03 Monique De Martin: What do you mean by power of governance? 00:19:20 Hunter Lydon: How do human souls share governance? 00:23:26 Joanne Ramundo: If we are unaware of our soul condition does the law allow us to govern without awareness? 00:27:34 Anna MacDonald: How do "God's Laws allow human souls to share governance"? Can you expand on this please? 00:30:56 Anna MacDonald: When the soul is in a unified state does its power double in strength? 00:33:49 Joyce Thompson: As very dark people on earth can have a lot of power over other people and creatures, is this power of Governance? 00:42:08 Group Question: Why does God allow the bad condition on earth to continue? 00:45:34 Joyce Thompson: Are powerful people on earth getting power from God, or from other people on earth who are willing to give power to them? 00:48:20 Alwyn Campbell: What will power look like when people on earth begin becoming at-one with God? 00:50:41 Nicky Primetica: Frequently more power is given to those in a lower development in love. e.g. politicians. Do Governance Principles work to restrict that person's influence over time? 00:53:20 Cathy Walker: Are there laws that determine the timeframe for how long it takes creations out of harmony with God's Principles to be destroyed? Why are they not destroyed faster than "eventually"? 00:58:47 Cathy Walker: If I die of a physical illness will I still be ill as a spirit? 01:01:14 Cathy Walker: With the example of the "Berlin Wall" is that an example of how fast things can change from the power of Governance? 01:05:07 Eloisa Lytton-Hitchins: Does anything govern God? Are there any other Gods? 01:05:42 Eloisa Lytton-Hitchins: How did God get to be such a Good Governor? 01:06:44 Eloisa Lytton-Hitchins: Could you please give some examples of how "each human soul automatically governs, but the power to govern is determined by development"? 01:08:42 Eloisa Lytton-Hitchins: Aren't we already exercising unloving desires en-mass and causing anarchy on earth?

Responsibility Principles

Terms: Responsibility principles are will-based, and will be discussed in relation to self-aware beings with free will. The human soul (not the body or spirit body) is a self-aware being with the ability to express free will depending on development and as such is the highest creation.

Energy includes information, energy, emotion, thought, communication, relationship or interplay within or between creation

Development increases in quality and capacity as the human soul lives in more harmony with God's Principles, and decreases as the human soul lives in less harmony with God's Principles

Power of governance is the energy able to be expressed by the human soul which varies in quality and capacity in direct relationship to development

Nature is each individual human soul's God given personality, attributes, characteristics, qualities, individuality, and primary fields of interest.

Self-Responsibility is the law based requirement of self-awareness, to seek truth, love and understanding of all principles of Love and law, and the loving ownership and expression of ones will, desire, passion, emotion, attitudes, intentions, thoughts and actions in harmony with God's Principles and laws.

Role-Responsibility is the assignment of specific roles of governance in God's Universe dependent upon development, self-responsibility, and according to one's nature.

Summary: Responsibility principles: Force the human to be self-responsible - Encourage the human to desire self-responsibility - Allow God to reward true self-responsibility with role-responsibility (i.e. role-responsibility is a compensatory gift given to those with self-responsibility)

Definition (What the principles are): The highest creation shall be a self-responsible being - The law shall enforce self-responsibility - The law shall reward self-responsibility with role-responsibility (i.e. role-responsibility is a compensatory gift given to those with self-responsibility)

Objectives (Why the principles are applied to law): The highest creation must be made responsible for the ownership and expression of its will, desire, passion, emotion, thoughts and actions - To ensure highest creation is accountable - To ensure anarchy is not possible for any creation - To restrict the highest creation from irreversibly harming any creation - To educate the highest creation that love is responsible and accountable - To determine individuals who qualify for role-responsibility - To reward self-responsible individuals with role-responsibility - To ensure that an individual's nature is fully satisfied and experienced - To form a foundation for God's highest principles that apply to the human soul such as Will, Desire, Compensation, Redemption and Transformation

Application (The creation and laws affected): All laws governing the human soul -

All laws governing the creations of the human soul - A secondary effect on all laws and all creation

Reveals (What the principles reveal about God): God feels Love always takes responsibility for creation - God feels Love is always directly accountable for creation - God is not reckless in creating the highest creation - God has taken responsibility for His creation of the highest creation - God wants the highest creation to enjoy its own nature - God loves all creation enough to restrict the highest creation - God loves rewarding those who act lovingly - God feels joy comes from self-care

Examples (The principles' applications in law): **Gravity and Aerodynamics**: Soul responsibility is enforced upon any person who wilfully attempts to break the Law of gravity or aerodynamics by using the law to desire to, or actually, harm themselves or others through negligence or direct action.

Law of Cause & Effect: Ensures individuals discover the relationship between what has happened (the effect) and what has caused the effect (the cause) so that individuals take full responsibility for their will, desire, passion, emotion, thoughts and actions.

Law of Compensation: Ensures individuals discover and receive the rewards for their own individual and collective responsible choices, and discover and receive the penalties for individual and collective irresponsible choices.

Law of Repentance: Ensures individuals become emotionally aware and emotionally repentant for each unloving choice and decision and become emotionally aware of his or her powerlessness to undo everything that has resulted from his or her unloving behaviour.

Conclusion: Responsibility principles: Responsibility principles ensure that God's highest creation is self-responsible, and is given role responsibilities in line with individuality and development.

Scope, hierarchy, governance, responsibility and compensation form a foundation for principles that apply to the potentials of the human soul such as will, desire, redemption and transformation.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that

oppose responsibility principles including: Wanting to be saved (by God, Jesus, parents, friends, partners, others) from the results of my creations - Not taking responsibility for my emotions,

desires, words or actions - Wanting power without responsibility or development - Wanting role-responsibility without self-responsibility - Placing people in positions of societal power (role

responsibility) when they are not self responsible - Looking up to and seeking guidance, 'truth' and 'love' from people who are not self responsible (e.g. family, gurus, teachers, counsellors, etc)

Questions About: (...as in other principles)

Questions Answered (group 1): 00:31:36 Christine Thorley: What is role responsibility? 00:38:25 Christine Thorley: Is role responsibility only for those who have returned to earth? 00:39:41 Christine Thorley: How are we made aware of our role? 00:41:20 Christine Thorley: Where in our progression would we need to have a role? 00:43:47 Christine Thorley: Do you have to be at-one with God to hear direct communication from God about role responsibility? 00:45:01 David Raizman: Are role responsibilities inbuilt in each soul and only accessed when we become self responsible beings? 00:48:48 Deidre Amos: Why do I have hard time with wanting to take responsibility or feel like I am responsible? It feels like responsibility is a dirty word and has a punishing connotation? 00:57:12 Anna Skevik: Have Jesus and Mary been rewarded with the role responsibility of being the teachers of Divine Truth? 00:58:12 Anna Skevik: How does role responsibility look like at the beginning of ones development of self responsibility? 01:00:34 Dave Robinson: How do Responsibility Principles encourage the human to desire self responsibility? 01:01:53 Dave Robinson: How do Responsibility Principles encourage development of self responsibility in positive vs negative ways? 01:05:09 Dave Robinson: What does the reward for being self responsible look like?

Questions Answered (group 2): 00:17:34 Sandra Tuszynska: Are the Responsibility Principles all about faith? 00:20:52 Elvira Gregorich: Is it possible to reject compensatory rewards? 00:22:44 Barbara McNair: Are people on earth allocated role responsibility automatically just like people in the spirit world are? 00:26:56 Barbara McNair: Do you feel God assigns role responsibility to people on earth in an obvious manner? 00:32:54 Karen Pronk: If I want to follow my desire which takes me to a role am I not assuming a role? 00:37:47 Karen Pronk: For role responsibility to happen must desire be engaged with humility? 00:38:40 Karen Pronk: If a person becomes a parent without consciously intending to, is God rewarding self responsibility with role responsibility? 00:45:32 Jesus: What If I am not ready to educate the child I have given birth to what can I do? 00:49:16 Joyce Thompson: Do we give role responsibility to each other and ourselves and/or is this a gift from God? 00:56:46 Jesus: When people ask Jesus about what their passions are how does he respond? 00:58:27 Courtney Pool: How can we develop more desire for more self responsibility? 01:02:14 Courtney Pool: Why do humans often not find joy in self-care? 01:04:24 Courtney Pool: Why do humans often give societal power and authority to people who are not self responsible or developed in love? 01:07:30 Courtney Pool: Why do we not want others to treat us like we're worth more?

Law Related Attitudes & Emotions

Jesus continues comparing human law with God's Laws by discussing the law related attitudes and emotions of God and humans, and the related attitudes and emotions of each towards God's Law, human law and law makers & enforcers

Law Drama

- **Entities involved in the "Drama":** God - Humans generally & myself personally - Human law makers (parents, caregivers, politicians and rulers) - Human law enforcers (parents, caregivers, judges and police)

- **Analysis of general attitudes and emotions towards law helps us identify our "Hangover":**

General Comments

Human law makers and human law enforcers (excluding parents and caregivers) are:

- Generally much better acquainted with the problems associated with human law than the average human is

- Generally have a higher appreciation of the application of law to assist society than the average human does

Consider

If humans are to become at-one with God, they will need to have the same attitudes and emotions about God's Laws that God has - Whenever we have a different attitude or emotion than God does, we are automatically sinning, and therefore creating more pain and suffering for ourselves

Comparison of Attitudes and Emotions

The following tables present:

Each entity's law related attitudes and emotions about law

Each entity's law related attitudes and emotions about the other entities in the drama

Each entity's law related attitudes and emotions about themselves individually

The way information is presented:

While each table presents the information from the perspective of each individual entity involved in the drama, the live presentation will only have time to compare God's law related attitudes and emotions with human law related attitudes and emotions.

God's Attitudes and Emotions About ...

Who/What	Summary of Attitudes and Emotions
God	God knows he is the ultimate law maker and law enforcer, and does not need humans to acknowledge this Truth. God is also not concerned about having problems enforcing law, since He knows he has created a perfect system with only loving outcomes where every law is self-enforcing.
Law	All of God's Laws are essential and created to: allow all creatures and matter survive, and... allow all living creatures to grow, thrive and develop, and... allow humans to be redeemed and transformed and blissfully happy.
Human law makers	God allows human law makers to create laws as they see fit even though human laws should not be necessary. If the laws created by humans are in harmony with God's Love, then the human law makers will be supported by God. If not then the human law makers will be penalized by God's Laws.
Human law enforcers	God allows human law enforcers to enforce laws as they see fit. If the enforcement is in harmony with God's definition of love, then the human law enforcers will be supported by God's Laws. If the enforcement is not in harmony with God's definition of love, then the human law enforcers will be penalized by God's Laws.
All humans	God Loves humans, views them as His Highest Creation, treats each human equally, desires their individual and collective happiness, and is compassionate towards them. He knows that if humans choose to obey His Laws they will receive everlasting benefits and be happy. If humans choose to disobey His Laws, they will create their own misery.

Human Law Maker's Attitudes and Emotions About ...

Who/What	Summary of Attitudes and Emotions
God	Generally do not believe they will need to answer to a higher law maker nor are they concerned about whether their laws are in harmony with the laws of the Highest law maker. Those who believe in God make many false presumptions about God's Laws, and those who are agnostic or atheist generally ignore any consideration of God's existence or power.
Law	Generally believe that laws should be made as a deterrence, using fear as a governing tool, to create order, to impose moral, economic, religious and society rules. They do not believe compliance with law should be rewarded, but strongly believe penalties and punishment are essential to maintain order. Generally do not believe God has laws that govern the human condition.
Human law	Generally see their own power as supreme and do not believe they will need to

makers	answer to a higher law maker or if they believe in God they presume their laws are in harmony with the laws of the Highest law maker. Believe they are performing a public service.
Human law enforcers	Generally believe that the law enforcer is their tool to enforce the penalties of the law they created.
All humans	Generally believe that humans are inherently imperfect and that it is human nature to break law. Therefore humans need to be restricted or deterred from harming or damaging themselves or others. Humans are never going to be loving or self-aware, so law makers need to stop unsociable behaviour by creating laws to govern society.

Human Law Enforcer's Attitudes and Emotions About ...

Who/What	Summary of Attitudes and Emotions
God	Generally do not believe they will need to answer to a higher law maker nor are they concerned about whether the enforcement of human law is in harmony with the laws of the Highest law maker. They see their own power as gifted by human law makers, and at times believe themselves to be above such laws.
Law	Generally see law as an arbitrary decision of the law maker, which changes from time to time. Feel enforcement must be tempered by practicalities. Do not believe in rewarding compliance with law, but strongly believe penalties and punishment are essential to maintain order. Believe that laws are a deterrence and use fear of penalty or punishment as a controlling tool.
Human law makers	Generally believe they must enforce the law of the law makers, whether they personally agree with or support the law created, whether those laws are loving, fair, or in harmony with God's Laws or not. Feel that human law makers do not consider or understand the practicalities of enforcing the laws they create.
Human law enforcers	Generally believe that they are the tool of enforcement of law. Believe law enforcement is a difficult job that requires constant compromise and commitment.
All humans	Believe that humans are inherently imperfect and that human nature is to break law. Humans need to be restricted or deterred from harming or damaging themselves or others. Humans are never going to be loving or self-aware, so law enforcers need to stop unsociable behaviour by enforcing laws to govern society.

Human Attitudes and Emotions About ...

Who/What	Summary of Attitudes and Emotions
God	Do not believe they answer to a higher law maker whether they believe in God or not. If they believe in God, they believe God cannot be fully understood, is punishing, wrathful and makes arbitrary decisions with no permanence, consistency or justice. If agnostic or atheist they generally do not consider God at all.
Law	Generally do not believe in God's Laws, or if they do believe God has laws, do not understand or know those laws. See human law as an arbitrary decision of the law makers, only adhere to laws they personally agree with, see all law as negotiable, and are proud of their ability to avoid the consequence of law where possible.

Human law maker	Generally see human law makers as lacking awareness, imperfect and able to fail, and generally disrespect law maker decisions.
Human law enforcer	Generally fear human law enforcers when such enforcers are visibly present and in the vicinity but generally disrespect law enforcers.
Themselves	Generally see their own power as supreme and do not believe they will need to answer to a higher law maker whether that be God or any human law maker. Generally each human is self involved and selfish, sees themselves as the arbiter of their own life, sees themselves as superior to other humans, and is governed primarily by their own emotions, feelings and thoughts, and believes that they personally should be shown mercy rather than having a law enforced on them.
Other humans	Generally believe humans are inherently imperfect and it is human nature to break law. Therefore humans need to be restricted or deterred from harming or damaging themselves or others. Humans are never going to be loving or self-aware, so law makers need to stop unsociable behaviour by creating laws to govern society and law enforcers need to force everyone (other than me personally) to obey the law.

Law Related Attitudes & Emotions

Conclusion:

Human attitudes to and emotions about law, and in particular about God's Laws, come from each individuals own experience with human authority, which is inconsistent at best, and very destructive at worst.

Attitudes and emotions from the childhood experience are imposed upon any authority, and severely affect the human desire to obey law. This creates a "human law hangover" that is imposed upon God's Laws, and which also the main creator of human unhappiness and pain.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose obedience to God's Law including:

Believing God is punishing or wrathful and makes arbitrary decisions with no permanence, consistency or justice - Believing God's Law is negotiable - Wanting laws to apply to others but not to self - Disrespect of authority, etc

The human law "hangover":

Analysis of general attitudes and emotions towards law helps us identify our "hangover". We will examine how these attitudes and emotions play out in the use of our desire and will to discover and be obedient to God's Laws in the presentation "Human Law Hangover".

Summary

God's Perspective: God's Laws are essential to human existence and survival - God's Laws allow all living creatures to grow, thrive and develop - God's Laws allow humans to be redeemed and transformed and blissfully happy - God loves all humans personally and knows humans are the highest creation - God allows law makers and enforcers to make and enforce laws - God desires human laws to be in harmony with God's Laws

Human Perspective: Human attitudes and emotions to law are damaged and distorted - Humans personally see laws as restrictive, arbitrary and negotiable - Humans are normally self-oriented having little concern for the welfare of others - Human law makers use laws as a deterrent for bad behaviour - Humans create laws mostly to maintain society cohesion

Reference Summary of Attitudes

The information on the following pages was not included in the original presentation, but is provided here as a reference.

Attitudes and Emotions About God ...

God: God knows he is the law maker and law enforcer - God not need humans to acknowledge Him as the law maker or Enforcer - God is also not concerned about having problems enforcing law - God knows he has created a perfect system with only loving outcomes

Humans generally: Generally do not believe they will need to answer to a higher law maker whether they believe in God or not. If they believe in God, they believe God cannot be fully understood, is punishing, wrathful and makes arbitrary decisions with no permanence, consistency or justice. If agnostic or atheist they generally do not consider God at all.

Human law maker: Generally do not believe they will need to answer to a higher law maker nor are they concerned about whether their laws are in harmony with the laws of the Highest law maker. Those who believe in God make many false presumptions about God's Laws, and those who are agnostic or atheist generally ignore any consideration of God's existence or power.

Human law enforcer: Generally do not believe they will need to answer to a higher law maker nor are they concerned about whether the enforcement of human law is in harmony with the laws of the Highest law maker. They see their own power as gifted by human law makers, and many times believe themselves to be above such laws.

Attitudes and Emotions About Law ...

God: All of God's created laws are essential in order to help all creatures and matter survive, all living creatures to grow, thrive and develop, and humans to be redeemed and transformed and blissfully happy.

Humans generally: Generally do not believe in God's Laws, or if they do believe God has laws, do not understand or know those laws. Generally see human law as an arbitrary decision of the law makers of the day, only adhere to laws that they personally agree with, see all law as negotiable, and are proud of their own ability to avoid the consequence of law where possible.

Human law maker: Generally believe that laws should be made as deterrence, using fear as a governing tool, to create order, to impose moral, economic, religious and society rules. They do not believe compliance with law should be rewarded, but strongly believe penalties and punishment are essential to maintain order.

Human law enforcer: Generally see law as an arbitrary decision of the law makers of the day, which can be changed from time to time, and which must be tempered by practicalities of enforcement. They do not believe compliance with law should be rewarded, but strongly believe penalties and punishment are essential to maintain order. Generally believe that laws should be a deterrence and use fear of penalty as a controlling tool to create order.

Attitudes and Emotions About Humans ...

God: God Loves humans, views them as His Highest Creation, treats each human equally, desires their individual and collective happiness, and is compassionate towards them. He knows that if humans choose to obey His laws they will receive everlasting benefits and be happy. If humans choose to disobey His laws, they will create their own misery.

My personal: I generally see my own power as supreme and do not believe I will need to answer to a higher law maker whether that be God or any human law maker. I am generally self involved and selfish, see myself as the arbiter of my own life, see myself as superior to other humans, are governed primarily by my own emotions, feelings and thoughts, and believe that I personally should be shown mercy rather than having a law enforced on me.

Humans generally: Generally believe that humans are inherently imperfect and that it is human nature to break law. Humans need to be restricted or deterred from harming or damaging themselves and others. Humans are never going to be loving or self-aware, so law makers need to stop unsociable behaviour by creating laws to govern society and law enforcers need to force everyone to obey the law.

Human law maker: Generally believe that humans are inherently imperfect and that it is human nature to break law. Therefore humans need to be restricted or deterred from harming or damaging themselves or others. Humans are never going to be loving or self-aware, so law makers need to stop unsociable behaviour by creating laws to govern society. This is a public service.

Human law enforcer: Generally believe that humans are inherently imperfect and that it is human nature to break law. Therefore humans need to be restricted or deterred from harming or damaging themselves or others. Humans are never going to be loving or self-aware, so law enforcers need to stop unsociable behaviour by enforcing the laws to govern society.

Attitudes and Emotions About Law Makers ...

God: God allows human law makers to create laws as they see fit. If the laws created by humans are in harmony with God's definition of love, then the human law makers will be supported by God's Laws. If the laws created by humans are not in harmony with God's definition of love, then the human law makers will be penalized by God's Laws.

Humans generally: Generally see human law makers as lacking awareness, imperfect and able to fail, and generally disrespect law maker decisions.

Human law maker: Generally see their own power as supreme and do not believe they will need to answer to a higher law maker or if they believe in God they presume their laws are in harmony with the laws of the Highest law maker. Believe they are performing a public service.

Human law enforcer: Generally believe that they must enforce the Law of the law makers, whether they personally agree with or support the law created, whether those laws are loving, fair, or in harmony with God's Laws or not, and that generally human law makers do not consider or understand the practicalities of enforcing the laws they created.

Attitudes and Emotions About Law Enforcers ...

God: God allows human law enforcers to enforce laws as they see fit. If the enforcement is in harmony with God's definition of love, then the human law enforcers will be supported and upheld by God's Laws. If the enforcement is not in harmony with God's definition of love, then the human law enforcers will themselves be penalized by God's Laws.

Humans generally: Generally fear human law enforcers when such enforcers are visibly present and in the vicinity but generally disrespect law enforcers.

Human law maker: Generally believe that the law enforcer is their tool to enforce the penalties of the law they created.

Human law enforcer: Generally believe that they are the tool of enforcement of law.

Questions Answered: 00:36:50 Natalie Mann: Do we carry the disrespectful attitude towards law because child caregiver's law seems self-serving? 00:38:17 Alan Atkinson: Can humans develop to the 6th sphere condition while still rejecting some of God's Laws? 00:39:34 Alan Atkinson: Is it true that we cannot get to the 6th sphere condition without obeying most of God's Laws? 00:40:47 Alan Atkinson: Why don't humans collectively strive to progress in love? 00:46:39 Yvonne Joy Harris: Are our attitudes towards others based upon our fear and lack of trust of others?

Human Law Hangover

Jesus analyses the previous "Human Law Comparison" and highlights the human individual and collective attitudes, feelings and emotions towards God's Laws that have come from a "Human Law Hangover"

Introduction

My personal pain

Since childhood I have been exposed only to parent and societal law

I have developed attitudes towards law (human and God's) that come from my childhood and adult experience

I have attitudes to God's Law which cause me much heartache and pain

I need to examine my attitude to God's Laws if I wish to become happy

Examining how attitudes affect my relationship with God's Laws & Principles

Human and parental law has created attitudes, emotions and beliefs within me about God's Laws and Principles that harm my perception and ability to engage my will to be obedient to God's Laws. Let's examine some of these.

Law Comparison "Hangover"

God's Law: The law maker is also the law enforcer and fully enforces obedience to every Law

Human Law: The law maker is usually not the law enforcer, and the law enforcer is not able to fully enforce obedience to any law created

My Erroneous "Hangover" Beliefs & Emotions: My obedience to God's Laws cannot or should not be enforced by anyone - When I sin against God's Law I will probably get away with the sin - God & God's Laws are unpredictable and inconsistent (just like my parents were) - God will be very tolerant of my choices and desires to sin (just like my parents were) - God will never enforce any law since that would be against my own definition of mercy

God's Law: The law maker and enforcer is infinitely and always aware, perfect and infallible

Human Law: The law maker and/or law enforcer has little awareness, is imperfect and able to fail

My Erroneous "Hangover" Beliefs & Emotions: God made a flawed humanity without the ability to be perfectly obedient - Since I am "flawed" God and other humans should make allowances for my flaws - God cannot "see", "hear" and "know" everything since humans in authority cannot - I should be able to "hide" and be dishonest about my own disobedience and sin - Confession is just harming myself rather than a part of redeeming myself

God's Law: Laws are created by the law maker and enforcer only for the benefit of the created creatures

Human Law: Laws usually created with a mixed and often unpredictable benefit, sometimes for the benefit of all creatures, sometimes only for the benefit of the human, sometimes only for the benefit of the law maker, and sometimes only for the benefit of the law enforcer

My Erroneous "Hangover" Beliefs & Emotions: God's Laws are a nuisance and should be ignored for the sake of personal advantage - God's Laws are just for the sake of God and do not benefit me personally - My only consideration should be what I judge as my personal welfare - Human welfare collectively is more important than the welfare of other creations - My anger and defiance towards God's Laws is valid and in my own interest - No law maker or enforcer including God has my own interest at heart - If I feel threatened I should be allowed to break the law and allowances should be made - Being obedient means having to do what others want and "working" for others in authority

God's Law: Laws are created for the purpose of maintaining survivability, growth, and transformation of all matter and living creatures within the Universe

Human Law: Laws primarily created for the purpose of being a deterrent

My Erroneous "Hangover" Beliefs & Emotions: God's Laws only impose restrictions on my life and make it harder to survive - God only created Law to restrain my "bad" nature that He created anyway - God's Laws do not reward me for obedience - God's Laws do not enable my free will - God's Laws are punitive and punishing, driven by an angry God who wants to harm me - God only wants to stop me from being happy - God's Laws limit my freedom and make it harder to survive in the "real" world - God's Laws are not practical

God's Law: Laws operate whether the creature is aware or not

Human Law: Laws operate only if the law enforcer is aware and willing to enforce the law

My Erroneous "Hangover" Beliefs & Emotions: Being "ignorant" of the law is to my own advantage - Allowances should be made for me if I do not know God's Laws - Allowances should be made for my "bad" (unloving) decisions and choices - I react angrily, resentfully, and indignantly when I am "corrected" for wrongdoing - I am able to cover over sin and get away with sin - If I am not "caught" in the moment of sin punishment will never happen - If God is "good" God would let me get away with sin - I should not be punished for sins that I thought only affected me

God's Law: Laws operate on the "heart", soul, attitude, character, thoughts and emotions of the human, along with operating upon the action taken

Human Law: Laws operate only on the action taken, and then only if the action is observed, processed and enforced, by the law enforcer

My Erroneous "Hangover" Beliefs & Emotions: God's Laws only apply to physical events

- God's Laws correct actions only (rather than thoughts, attitudes, character & emotions) - I can lie or misrepresent to God what is in my heart - If I have not been "caught" then I will never be punished - If God "catches" my disobedience I will be able to negotiate the punishment with God - If God "catches" my disobedience I only have to change my actions (not my heart) - God is unjust to examine my heart

God's Law: Laws operate consistently under all circumstances with no exceptions

Human Law: Laws operate differently in each country and are inconsistently applied according to wealth, social status or position, race, gender, nationality, and hundreds of other variable factors including withholding truth, misrepresenting truth, lying, and violence

My Erroneous "Hangover" Beliefs & Emotions: My version of superiority (race, gender, status etc) should count with God - I am a "special case" that God should make allowances for - My unloving behaviour is justified by other's unloving behaviour - God should know that other people's unloving behaviour is worse than my own - Other people's motivations are worse than my own - Punishment should be able to be negotiated based on my status

God's Law: Each law has loving penalties if disobeyed, and loving rewards when obeyed, and the penalties and rewards are consistent and predictable

Human Law: Each law generally only has penalties when disobeyed, and then only if the disobedience is observed, processed and enforced, by the law enforcer. Many penalties are unloving. Obedience is rarely rewarded. The results are usually unpredictable.

My Erroneous "Hangover" Beliefs & Emotions: There are no rewards for heart-felt obedience to God's Laws - I will only be penalised if I am "caught" - If it appears I have not been "caught" then I have avoided the penalty - God does not penalise at all because God should be "loving" - God cannot be relied upon to give just penalties and will not be compassionate - I will not be rewarded for being honest and truthful about my sins - God should let me get away with things that others should be punished for - God will punish me for things that others get away with - I only have to do it right and I should not have to "feel" it right - If I punish myself then I should be able to avoid punishment by the Law - I should not get punished when I am already punishing myself

God's Law: Each law deals with and addresses both the cause (relating to why the human used their will to disobey or obey the law) and the effect (the fact that the human did so use their will in a loving or unloving manner)

Human Law: Law only deals with disobedience, and then does not fully address the effect but rather only provides "punishment" to act as a deterrent to further disobedience. Does not address the cause of any action, and does not reward loving action.

My Erroneous "Hangover" Beliefs & Emotions: I should be able to just change my action rather than have to correct my attitude - I should be able to avoid recognition of the harm I have caused to others and the environment - God's Laws are "anally retentive"¹ and "nit-picking" - God wants to punish me for no real reason e.g. I did not do it, I only felt it! - God's Laws will not punish me when I don't believe I should be punished - God's Laws will not force me to face the consequences of my disobedience - Being happy means being able to do what I want when I want

Conclusion

Human law hangover: Humans are "drunk" on their own perception of law - Humans see God's Law similarly to how they see human law - Humans impose their perception of human laws on God's Laws - Humans create a huge amount of pain and suffering as a result of the human law "hangover" - Unless I personally stop treating God's Laws like human laws, I will continue to remain unhappy and in pain

Summary

Human law hangover: There is an enormous difference between God's Laws and human laws - Each human law hangover prevents us from desiring to obey God's Laws - Sin is generated by the desire to avoid discovering and obeying God's Laws - Each sin creates more pain and suffering for humans individually and collectively

¹ "An anal *retentive* person is a person who pays such attention to detail that it becomes an obsession and may be an annoyance to others"

Questions Answered 00:41:39 Alan Atkinson: Am I sinning by supporting someone trying to avoid a human law?

Human Law Hangover Q&A

Questions About: Response to human laws (and parental laws) - The law maker/enforcer is not able to enforce obedience to any law - The law maker/enforcer has little awareness, is imperfect and able to fail - Laws created with a mixed and often unpredictable benefit - Laws created for the purpose of being a deterrent - Laws operate only if the law enforcer is aware and willing to enforce the law - Laws operate only on the action taken if the action is observed, processed and enforced, by the law enforcer - Laws operate differently in each country and are inconsistently applied - Each law generally only has penalties when disobeyed, and then only if the disobedience is observed, processed and enforced, by the law enforcer - Many penalties are unloving - Obedience is rarely rewarded - The results are usually unpredictable - Law only deals with disobedience, and then does not fully address the effect but rather only provides "punishment" to act as a deterrent to further disobedience - Does not address the cause of any action, and does not reward loving action

Response to God's Laws

The law maker is also the law enforcer and fully enforces obedience to every Law - The law maker and enforcer is infinitely and always aware, perfect and infallible - Laws created only for the benefit of the created creatures - Laws created for the purpose of maintaining survivability, growth, and transformation - Laws operate whether the creature is aware or not - Laws operate on the soul, attitude, character, thoughts and emotions of the human - Laws operate consistently under all circumstances with no exceptions - Each law has loving penalties if disobeyed, and loving rewards when obeyed - The penalties and rewards are consistent and predictable - Each law deals with and addresses both the cause and the effect

Hangover attitudes & emotions towards human law / Hangover attitudes & emotions towards God's Laws

Questions Answered 00:01:32 Jadda Jessop: Is there a danger in measuring the law by effects since the human soul can effect the effects? 00:05:32 Jadda Jessop: How is it that one person can discover the law and utilise a law and everyone can benefit without having to learn the law for themselves? 00:07:36 Jadda Jessop: Was one of the reasons why the persons who discovered the aerodynamic laws were able to discover the laws because they wanted to benefit others? 00:11:02 Bruce Carrigan: Would patents be an unloving practice? 00:11:14 Bruce Carrigan: Is it unloving to question or oppose government laws that are not in line with God's Laws or Love Principles or should we just trust governments? 00:14:16 Loise White: Why didn't Jesus teach God's Laws & Principles in the 1st century? 00:15:07 Loise White: Why has humanity not awakened to the concept of God's Laws before? 00:17:09 Loise White: Will all of humanity embrace God's Laws when we are tired of pain and suffering? 00:19:08 Loise White: Do we need to embrace the injuries about parental authority before we can embrace God's Laws? 00:20:21 Loise White: Is it unloving to make an unconscious mistake? 00:21:13 Felix Hogel: Is the only difference between punishment and penalty that penalty is without anger and for everybody's happiness? 00:23:36 Dave Robinson: How do I stop or even grow a desire to stop treating God's Laws the same as I do human laws? 00:27:04 Jadda Jessop: Do you feel adding positive compensation to human law for obedience is a good idea?

Questions Answered (group 2): 00:01:34 Paige Willoughby: Is the desire to live in harmony with self responsibility the key to exposing and deconstructing all my hangover beliefs and emotions? 00:08:47 Paige Willoughby: Is the reason I am not aware of loving rewards due to the fact that I choose to ignore or deny the loving correction and penalties when I disobey God's Principles and Laws? 00:16:44 Nicky Primetica: If current human laws are not ultimately in harmony with God's Laws but assist in the governance of humans in our current condition, will God still support those laws? 00:19:22 Nicky Primetica: As human law makers strongly believe that penalties and punishments are necessary to maintain order, has this attitude predominantly come from the priesthood and their fear-mongering attitudes to get others to conform to their false beliefs about

God? 00:23:11 Nicky Primetica: I have a feeling that in order to implement God's Laws on Earth, the earth would be sectioned by Law, not country borders as it currently is. How do you feel about this? 00:26:36 Nicky Primetica: If there are sections in different countries would that encourage people in lower conditions to go through those lessons? 00:28:24 Nicky Primetica: If somebody first embraces loving concepts and ideas then can celestial spirits assist them to implement those ideas and laws? 00:29:38 Rachael Bush: Is it a requirement of God's Law to obey human laws even if it limits your free will but is not being unloving to others? 00:32:54 Rachael Bush: Is it loving to not obey laws of a country that I find unloving, feel are unjust, or that seem to oppress my will? 00:35:06 Peter Lytton-Hitchins: Can you share what happens in our soul when we are obeying law through fear compared to a desire to obey? 00:36:04 Peter Lytton-Hitchins: Does obeying law through fear come from parental upbringing and education at school? 00:38:23 Peter Lytton-Hitchins: If we are law abiding citizens when we are just terrified to disobey, from God's perspective are we still breaking law?

Compensation Principles

Terms: Compensation principles are will-based, and will be discussed in relation to self-aware beings with free will. The human soul (not the body or spirit body) is a self-aware being with the ability to express free will depending on development and as such is the highest creation.

Self-Responsibility is the law based requirement of self-awareness, to seek truth, love and understanding of all principles of Love and law, and the loving ownership and expression of one's will, desire, passion, emotion, attitudes, intentions, thoughts and actions in harmony with God's Principles and laws.

Compensation is the reward provided to the soul and its environment for self-responsibility (the obedience to God's Principles), or the corrective penalty enforced upon the soul and its environment for the disobedience to God's Principles.

Summary: Compensation principles: Educate the human soul about the concept of sin - Provide compensation (reward or correction) to the soul - Ensure self-responsibility is the measure for compensation - Force the highest creation to be responsible and accountable - Compensate consistently and predictably according to the soul's actual level of self-responsibility whether the external environment is affected or not

Definition (What the principles are): The law shall provide compensation to the soul and its environment - The law shall ensure self-responsibility is the measure for compensation - The law shall ensure that the highest creation is made responsible and accountable for its own level of self-responsibility via compensation - The law shall have a consistent compensatory effect according to the soul's level of self-responsibility whether the external environment is affected or not by the soul's emotions, decisions, and actions

Objectives (Why the principles are applied to law): To compensate the highest creation for its own level of self-responsibility - To educate the highest creation that love creates pleasure and sin creates pain - To educate the highest creation that the gift of free will brings responsibilities - To create the framework for evolution and devolution of the soul - To allow intelligent creations to solve problems associated with cause & effect - To generate within the highest creation a desire for truth and love - To build on the Responsibility principle to create the foundation for God's highest principles that apply to the human soul such as will, desire, redemption and transformation

Application (The creation and laws affected): All laws governing the human soul - All laws governing the creations of the human soul - A secondary effect on all laws and all creation

Notes: Sins committed by others that affect me attract pleasurable compensation and allowance towards me - Sins committed by me that affect others trigger a pleasurable compensation and allowance towards others - Sins committed by me attract a negative penalty towards myself - Sins committed by any person trigger a negative penalty toward those who committed the sin

Reveals (What the principles reveal about God): God feels Love always rewards self-responsibility - God was not reckless in creating Her highest creation - God has taken responsibility for Her creation of the highest creation - God wants the highest creation to understand how to enjoy life -

God loves all creation enough to restrict the highest creation - God loves rewarding those who act lovingly - God feels joy comes from self-responsibility - God feels everything is connected, and nothing operates in a vacuum - God feels love provides loving limitations and takes corrective action - God honours free will choices and decisions - God feels humans must take full responsibility for their own creations - God feels the heart-felt condition of the human is of extreme importance - God believes in and supports the redemption of the human towards goodness - God feels recovery from bad choices is possible since he made it possible

Examples (The principles' applications in law): **Gravity and Aerodynamics:** Compensation is provided, through the form of physical, emotional, and spiritual pleasure or pain, for obedience or disobedience to the laws of gravity or aerodynamics. The amount of compensation is applied consistently based upon the level of self-responsibility and the intention of the individual. **Law of Cause & Effect:** Ensures individuals are compensated for the cause that exists within them based upon their level of self-responsibility so that the individual is educated about the relationship between causes and effects, and can take actions to remove causes that generate undesired or painful effects. **Law of Compensation:** This law merges the principles of Will, Desire, Scope, Hierarchy, Responsibility and Compensation into a single complete law system that is then applied to the human soul itself, and in a secondary manner, to all of creation. Provides rewards and corrections. **Law of Repentance:** Repentance is God's desired attitude from the human towards disobedience to all law. Repentance would not be possible as a concept if Compensation principles did not exist. i.e. Compensation provides the measure of whether something is "good" (in harmony with Love) or "bad" (out of harmony with Love). Without the measure, no repentance is possible. Disobedience without compensation would result in no correction of disobedience, and therefore repentance for disobedience would also not be possible..

Conclusion: Compensation principles: Ensure that God's highest creation becomes aware of and is compensated (rewarded or corrected) for the manner in which it engages self-responsibility. Compensation principles are also linked to scope, hierarchy, governance and responsibility, and form a foundation for God's highest principles that apply to the human soul such as will, desire, redemption and transformation. Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose compensation principles including: Feeling that disobedience will never be penalized or corrected and obedience will never be rewarded - Feeling they can sin with impunity, minimizing and justifying sin - Feeling that they only sin if they act (e.g. get your "sexual" appetite anywhere, release it at home) - Complaining about the negative compensation effects that the person has created through their own free will choices, etc

Questions About: (...as in other principles)

Questions Answered (group 1): 00:17:00 Rita Hogel: Can we remove the causes of our sin or is it that only God can remove the causes of sin? 00:30:46 Deidre Amos: Jesus helps the audience to see that self responsibility is an on or off condition based upon desire 00:34:54 Deidre Amos: What do you mean by the definition "The law shall ensure self-responsibility is the measure for compensation"? 00:42:47 Deidre Amos: Can you please give an example for the following statement "sins committed by others that affect me attract pleasurable compensation and allowance towards me"? 00:55:26 Jennifer Heibloem: If our development is less does it mean we are more under Compensation Law? 00:57:15 Jennifer Heibloem: How do Compensation Principles treat a person with less learning capacity? 00:58:38 Yvonne Joy Harris: Are the injuries of wanting others to do things for us all because of a lack of self responsibility? 01:02:11 Natalie Mann: To engage the process of repentance is it as simple as wanting to be accountable for my actions? 01:04:51 Natalie Mann: Is it my seeking to know that will help me to awaken to my sin?

Questions Answered (group 2): 00:09:53 Lani Reid: Is a desire to fix up my impure desire an unloving desire? 00:11:07 Lani Reid: So have I been worried about the outcome rather than examining my real desire? 00:11:59 Lani Reid: If my desire is pure, can God bring me many more possibilities and potentials? 00:15:50 Example: Compensation for a man stealing my car 00:19:01 Peter Lytton-Hitchins: Referring the example, does compensation go further and analyse all of the causes of an outcome? 00:20:39 Rui Henriques: How does God know that my anger was triggered

from the actions of another person? 00:22:05 Elvira Gregorich: Referring the example, are parents responsible for their child's sin partially or fully? 00:22:49 Elvira Gregorich: Aren't most of my choices my own responsibility? 00:23:20 Elvira Gregorich: Even if your family believes stealing is OK, surely there are other messages from society that stealing is not OK? 00:25:06 Claudia Vandenameele: How come we get allowance from God while we have attracted the event in the first place? 00:26:02 Adria Escudero: If I stole your care, and you got angry, why would your anger get a positive compensatory benefit? 00:28:05 Mary: Is it also because we have this black and white "you're to blame and I'm not" thinking rather than considering the myriad of variables that God considers? 00:48:57 Katrina Bailey: What is the timeframe in which God applies compensation; either a reward or correction? 00:50:10 Joyce Thompson: If the Law of Compensation is immediate upon the soul, how soon does this manifest in the body and life and is there always an obvious connection? 00:57:10 Anna MacDonald: Why are some of us so inherently afraid of responsibility? 01:04:31 Maximilian Ferraiuolo: Is self responsibility the measure for compensation because once a person takes personal responsibility for their sin, they have a sincere desire to correct the cause and the effect of their sin; they are already doing what compensation would do? 01:06:48 Paige Willoughby: Could you please elaborate on the objective "to educate the highest creation that the gift of free will brings responsibilities"?

Session 2 Review, Conclusion & Homework

Mary reviews and concludes the "Order Principles" session, and gives some homework to the participants for the following day

Introduction

Order Principles

How the human soul fits into the Universe

How the human soul affects the Universe itself

How the human soul affects the lower creations within the Universe

What role the human soul has within the Universe

God's Universe diagram

Definitions

Human Will is the genuine personal expression of the gift of Free Will, is determined by the current soul based emotional condition, is developed by desire, is measured by its relative harmony with God's Principles, and drives the thoughts, beliefs, attitudes, actions, allowance of inspiration and response to memories of the individual

Self-Responsibility is the Law based requirement of self-awareness, to seek truth, love and understanding of all principles of Love and Law, and the loving ownership and expression of one's will, desire, passion, emotion, attitudes, intentions, thoughts and actions in harmony with God's Principles and Laws.

Role-Responsibility is the assignment of specific roles of governance in God's Universe dependent upon development, self-responsibility, and according to one's nature.

Compensation is the reward provided to the soul and its environment for self-responsibility (the obedience to God's Principles), or the corrective penalty enforced upon the soul and its environment for the disobedience to God's Principles.

Presentation Reviews (only some of the homework):

How am I living in and/or out of harmony with Hierarchy/Governance principles?

Responsibility principles

Conclusion: Responsibility principles ensure that God's highest creation is self-responsible, and is given role responsibilities in line with individuality and development. Scope, hierarchy, governance, responsibility and compensation form a foundation for principles that apply to the potentials of the human soul such as will, desire, redemption and transformation.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose responsibility principles including: Wanting to be saved (by God, Jesus, parents, friends, partners, others) from the results of my creations - Not taking responsibility for my emotions,

desires, words or actions - Wanting power without responsibility or development - Wanting role-responsibility without self-responsibility - Placing people in positions of societal power (role responsibility) when they are not self responsible - Looking up to and seeking guidance, 'truth' and 'love' from people who are not self responsible (e.g. family, gurus, teachers, counsellors, etc)

Homework. Harmony: How am I living in and/or out of harmony with Responsibility principles?

Responsibility: What do I think it means to be fully self-responsible? How am I taking full responsibility for self? Would God give me role-responsibility given my current level of self-responsibility?

Compensation: How am I living in and/or out of harmony with Compensation principles?

Conclusion: Order Principles: Presentations pertain primarily to the laws governing the human soul itself. The "Order Principles" session primarily discussed some of the principles that determine the laws associated with how the human soul FITS INTO the Universe - Next session: Soul Specific Principles: "Soul Specific Principles" is the next 2 day session. The "Soul Specific Principles" session primarily discusses some of the principles that determine laws that govern the POTENTIAL of the human soul within the universe and how the human soul progresses or evolves, or regresses and devolves.

Questions Answered 00:44:39 David Ryan: Question about Question 2: What do I think it means to be fully self-responsible? 00:46:50 Rita Hogel: Can I be my own law enforcer while I am still undeveloped? **Group 2:** 00:28:51 Rebecca Johnstone: Would you say it is good to reflect about the consequences for my injuries to develop a desire to change those injuries? 00:29:37 Laura Tollie: Is there a way to utilise question 4 so it is not a yes or no answer?

Session 2. Reminders & Homework Review

Mary works through reminders from the previous "Order Principles" session and reviews the homework

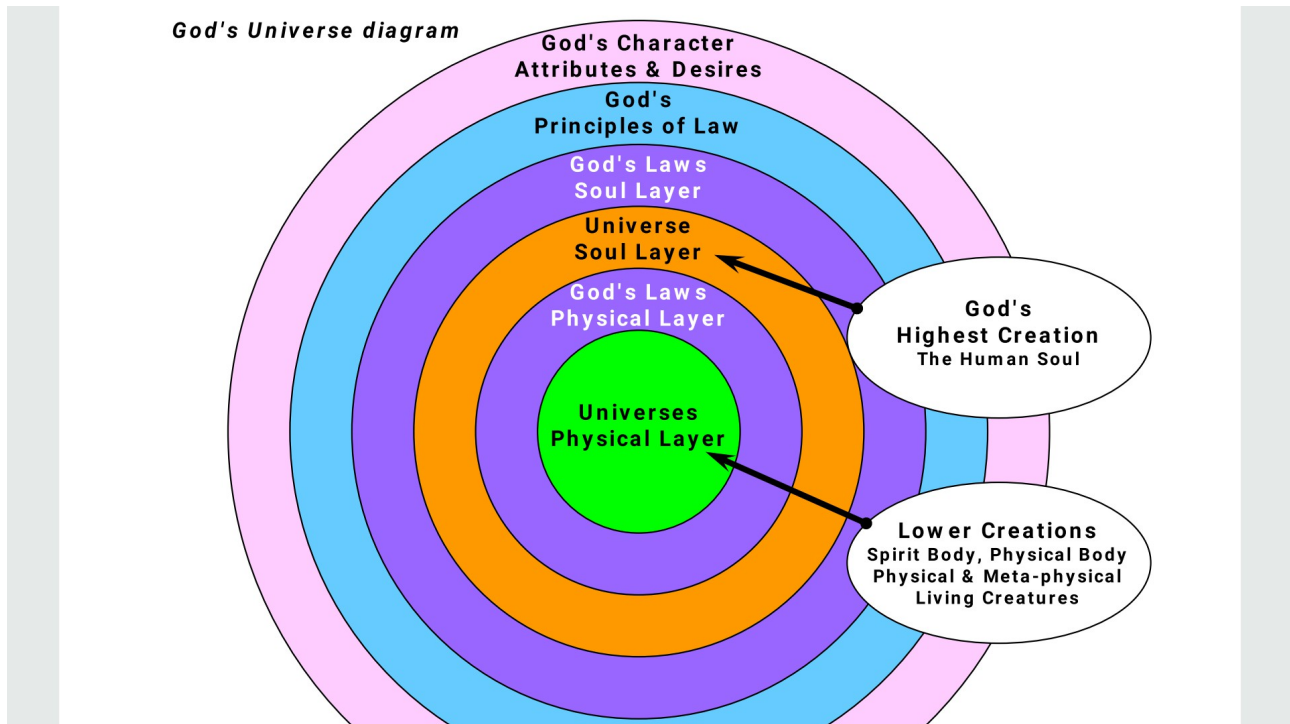

Introduction

Structure of reminders and homework: Will present reminders of each presentation for the "Order Principles" session - When get to each one of God's Principles, will ask the homework question: How am I living in and/or out of harmony with the "Order Principles"? When get to Responsibility principles will ask the additional questions: What do I think it means to be fully self-responsible? How am I taking full responsibility for self? Would God give me role-responsibility given my current level of self-responsibility?

Presentation Reminders: Order Principles: How the human soul fits into the Universe - How the human soul affects the Universe itself - How the human soul affects the lower creations within the Universe - What role the human soul has within the Universe

Questions Answered: 00:42:00 Jennifer Chadwick: Can I be self responsible while I still have a facade? 00:42:57 Jennifer Chadwick: Can we be fully responsible in one area of our life and not be in another?

Introducing Soul Specific Principles

Soul Specific Principles session covers God's Principles that allow:

The human soul half's potential and the complete soul's potential of expression while connected to the spirit and physical bodies in the physical universe - The human soul's potential in: The soul universe - Other universes which may come into existence due to the future transformation of the human soul - The potential discovery of higher parts of the human soul which either come into existence, or which have always been present, but which can only exist in higher universes - The potential of the human soul to create higher universes

Terms Used

Hierarchical universes can be constructed, each one governing and containing multiple universes of the lower hierarchical type.

Physical universes are the lowest human based hierarchical universes and are the physical and spiritual universes (complete with all spheres) able to be perceived through the senses of the physical and spiritual bodies.

Soul universe is the current highest human based hierarchical universe. It can only be perceived by the soul in a self-aware state and also contains unaware souls.

Will is the genuine personal expression of the gift of Free Will, is determined by the current soul based emotional condition, is developed by desire, is measured by its relative harmony with God's Principles, and drives the thoughts, beliefs, attitudes, actions, allowance of inspiration and response to memories of the individual.

Desire or aspiration is the genuine expression of current soul based faith, can only occur in self-aware beings, is measured by its relative harmony with God's Principles, is expressed as an intended or aspired to soul based emotional state, motivates future will based decisions, choices and actions, and differs from instinctual need.

Sin is the existence of will or desire in disharmony with God's Principles whether the will or desire is acted upon or not.

Human redemption is the process of paying the penalty for and removing sin from the human soul in order to recover the human soul back to its created pristine condition. It is a will based self reliant process that involves the enforced painful release of emotion. Forgiveness is accomplished through emotional "forgetfulness" of past sin and the correction of the desire to sin.

Divine redemption occurs only through a personal relationship with God, and is the process of wilfully desiring and engaging God's Help to remove sin from the soul. It recognizes that only God

can remove all the effects of our sin, asks God to help removing the cause of sin, to receive God's Truth on all matters, and to eventually obtain immortality.

Transformation is the potentiality offered to the human soul with sincere and passionate desire to exceed its original created condition and potentials as a human, and to allow God's Personal Love to be absorbed by the soul in order to transform the soul into an immortal Divine creature with the potential of infinite expansion. Transformation principles are the most complex principles.

Soul specific principles (this session): Will, Desire, Redemption, Transformation

Will: Human will is driven by the soul's current condition and determines what the soul will automatically do in the current moment unless desire is engaged to progress or regress.

Desire: Human desire is driven by what the soul currently has faith in and determines what the soul desires in and for its future. Desire can be positive and drive progression, or negative and drive regression.

Redemption: Redemption is a process by which the human itself can return either to its original created condition (human redemption), or to a new condition which prepares the soul for a relationship with God.

Transformation: Transformation is the potential offered to the human soul with sincere and passionate desire to exceed its original created condition and potentials as a human, and allows God's Personal Love to be absorbed by the soul in order to transform the soul into an immortal Divine creature with the potential of infinite expansion. Transformation principles are the most complex principles.

Conclusion. Summary

The "Soul Specific Principles" session discusses some of the principles that determine Laws that govern the potential of the human soul within the universe and how the human soul progresses or evolves, or regresses and devolves through the universe and how the human soul obtains these potentials.

Human Will Principles

Jesus briefly summarizes how God's Laws respond to human will, and gives examples of how these Human Will Principles are built into God's Laws and act upon all matter according to the human soul's current condition

Terms:

Free Will is the God given gift of the ability to be a self-aware being able to make self-responsible and self-generated decisions and choices, and able to have desires which come from self-awareness rather than instinct.

Will is the genuine personal expression of the gift of Free Will, is determined by the current soul based emotional condition, is developed by desire, is measured by its relative harmony with God's Principles, and drives the thoughts, beliefs, attitudes, actions, allowance of inspiration and response to memories of the individual.

Will is driven by the soul's current condition and determines what the soul will automatically do in the current moment unless desire is engaged to progress or regress.

Summary: Human Will principles: Ensure all laws respond to the will of the human - Ensure all laws satisfy the will used in harmony with God's Love and correct the will used in disharmony with God's Love - Give power and joy to God's Highest Creation to create independently, to govern, to be responsible, compensated and redeemed

Definition (What the principles are): The law shall provide compensation to the soul and its environment - The law shall ensure self-responsibility is the measure for compensation - The law shall ensure that the highest creation is made responsible and accountable for its own level of self-responsibility via compensation - The law shall have a consistent compensatory effect according to the soul's level of self-responsibility whether the external environment is affected or not by the soul's emotions, decisions, and actions

Objectives (Why the principles are applied to law): To allow God's Highest Creation to create independently - To ensure God's Highest Creation governs and is self-responsible - To give role-

responsibility to humans who are self-responsible - To enforce compensation to humans for the use of will - To ensure that all creation responds to human governance - To ensure God's Laws create attractions based upon will - Compensation, responsibility, governance, redemption and transformation principles are applied uniquely to humans because of the gift of free will

Application (The creation and laws affected): All laws governing the human soul - All laws governing the creations of the human soul - A secondary effect on all laws and all creation

Reveals (What the principles reveal about God): God respects and honours His gifts to humans - God generously desires humans to experience the joy of creation - God feels that real joy comes from being self-responsible - God feels love involves providing potentials for the expression of will - God wants us to be emotional beings with capacity for happiness

Examples (The principles' applications in law): **Gravity and Aerodynamics:** Engaging the laws of aerodynamics is only possible for humans by using will to understand the laws. Compensation is applied for will based engagement with both laws. **Law of Attraction:** Our will (current soul based condition) determines what we currently attract. All attractions either correct or reward our condition. Determining attractions with the mind is a pointless exercise. **Law of Cause & Effect:** Human health is only possible by understanding the relationship between the unloving use of our will and disease or sickness occurring in the human body. Each specific disease or sickness results from a specific unloving emotion, either directed towards self, another person, or the environment. **Redemption of the human soul:** Redemption principles operate automatically to change the will by causing the creation of pain when we sin and the release of pain when the pain becomes too intense to suppress within us. Redemption principles can be engaged with desire by making a choice to emotionally engage forgiveness and repentance with faith in emotional release being of benefit, which rapidly speeds the process of redemption. Redemption principles can be engaged with God, by sincerely desiring God's love and forgiveness (the desire is repentance), which has the added benefit of preparing the soul through prayer for the reception of God's Love and the establishment of a relationship with God. **Development of the human soul:** Development of the human soul (to the perfect natural human) is possible without awareness due to the Laws of Compensation and principles of redemption operating upon the will. i.e. By causing the creation of pain when we sin and the release of pain when the pain becomes too intense to control. Eventually development results in the redemption of the human soul to the point of the perfect natural human, but no further development can be obtained without desire.

Conclusion: Human Will principles: Human Will principles allow the human soul to be the creation at the top of the hierarchy system, to be responsible, to govern, and be compensated and redeemed. Human Desire principles allow the potential for change, growth, development and transformation of the human soul into a Divine being with immortality.

Will is driven by the soul's current condition and determines what the soul will automatically do in the current moment unless desire is engaged to progress or regress.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human will principles including:

Attempting to use will-power to change - Refusing to admit to my current emotional condition - Refusing to admit my sin - Refusing self-awareness, pride, being driven by addiction, acting upon unloving desires (causing my will condition to degrade) - Denying responsibility for my will (denying I have choice) - Blaming others for the use of my will (my past pain, others in my life), etc

Questions About: (...as in other principles)

Questions Answered (group 1): 00:15:12 Arvarna Lowe: After we get into harmony with the Law does it take some time before we feel the reward? 00:16:08 Tristan Miller: Does being sincere mean being sincere emotionally, rather than just doing the "right" thing while not feeling sincere?

00:17:03 Felix Hogel: Do you mean we get rewarded for automatic feelings and actions that are in harmony with God's Laws? 00:18:32 Felix Hogel: If I give a gift and have faith that God will reward me, is that a sincere desire? 00:19:08 Felix Hogel: Isn't it faith that God will reward good deeds that drives us to act lovingly?

Questions Answered (group 2): 00:12:55 Bruce Carrigan: Is our will like our facade? 00:14:39

Laurleen Lee: When we are a child does our parents' will become our own will, and if so, how do we ever change? 00:15:19 Alwyn Campbell: I am not clear about how a person in a dark condition can be attracted to a lighter person for inspiration? 00:25:49 Karen Pronk: If I attract good people in my life who help me, does that mean I have a stronger emotion causing that attraction? 00:33:26 Adria Escudero: Can I use will power to start up my desire for change?

Human Desire Principles

Jesus briefly summarizes how God's Laws respond to human desire, and gives examples of how these Human Desire Principles are built into God's Laws and act upon all matter according to the human soul's current faith

Terms: Human Desire or Aspiration is the genuine expression of current soul based faith, can only occur in self-aware beings, is measured by its relative harmony with God's Principles, is expressed as an intended or aspired to soul based emotional state, motivates future will based decisions, choices and actions, and differs from instinctual need.

Desire is driven by what the soul currently has faith in and determines what the soul desires in and for its future.

If will and desire are in harmony change is not possible

Summary: Human Desire principles: Ensure all laws respond to the desire of the human - Ensure all laws satisfy the desire used in harmony with God's Love and correct the desire used in disharmony with God's Love - Allow the potential for change, growth, development and transformation of the human soul into a Divine being with immortality by engaging God's Principles of Redemption and Transformation

Definition (What the principles are): The Law shall respond to desire - The Law shall satisfy desire used in harmony with God's Principles - The Law shall correct desire used out of harmony with God's Principles

Objectives (Why the principles are applied to law): To allow God's Highest Creation to change and grow irrespective of its current soul condition or external environmental factors - To allow God's Highest Creation to experience the happiness of having desires in harmony with Love satisfied - To allow God's Highest Creation to experience the pain of having desires out of harmony with Love satisfied - To ensure that humans see the true effect of their desires upon creation - To ensure God's Laws create attractions based upon desire - To ensure new potentials exist for humans based upon desire - To ensure that "wish and desire is closely interwoven with the opportunity for gratification" Aphraar, Through the Mists - New potentialities of Compensation, Responsibility, Governance, Redemption and Transformation principles are enabled by human desire

Application (The creation and laws affected): All laws governing the human soul - All laws governing the creations of the human soul - A secondary effect on all laws and all creation

Reveals (What the principles reveal about God): God respects and honours His Gifts to humans - God generously desires humans to experience the joy of desire - God feels that real joy is experienced by having loving desires satisfied - God's Love provides potentials that result from the expression of desire - God wants humans to be desirous beings with new aspirations - God feels desire is an essential part of living - God feels love gives humans the potential to change

Examples (The principles' applications in law): **Gravity and Aerodynamics:** Engaging the laws of aerodynamics was only possible for humans by someone using their desire with faith to understand the laws. Desire is rewarded by knowledge being obtained. **Law of Attraction:** Our desire (genuine expression of soul based faith) determines what we attract now to enable change. All attractions "satisfy" our current desire, even when those desires are unloving. Unloving desires can be measured by the pain they create. **Human hunger:** True hunger compared to addictive eating. True hunger is an automatic animal instinct necessary for survival of the body connected to an undeveloped soul. Addictive hunger is a desire to satisfy the demands of our current emotional condition (our will). **Redemption of the human soul:** Redemption principles operate automatically to change the will by causing the creation of pain when we sin and the release of pain when the pain

becomes too intense to suppress within us. Redemption principles can be engaged with desire by making a choice to emotionally engage forgiveness and repentance with faith in emotional release being of benefit, which rapidly speeds the process of redemption. Redemption principles can be engaged with God, by sincerely desiring God's love and forgiveness (the desire is repentance), which has the added benefit of preparing the soul through prayer for the reception of God's Love and the establishment of a relationship with God. **Transformation of the human soul:**

Transformation of the human soul (into the Divine angel) is not possible without desire. Desire draws Transformation principles into play in Laws operating upon the human soul, and desire for God also engages God's Desire to transform the human through the transmission of God's Love into the human soul. The subsequent result is not only an increasing relationship with God, but, due to the reception of God's Love, the transformation of the soul itself into a new creature with increased current capabilities and future potentials.

Conclusion: Human Desire principles: Human Desire principles allow the potential for change, growth, development and transformation of the human soul into a Divine being with immortality. Human Will principles allow the human soul to be the creation at the top of the hierarchy system, to be responsible, to govern, and be compensated and redeemed.

Desire is driven by what the soul currently has faith in and determines what the soul desires in and for its future. If will and desire are in harmony change is not possible.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human desire principles including: The concept that desire must be suppressed to attain spiritual enlightenment - Constantly needing to be inspired - Resisting the development of my own aspirations - Resisting the development of faith - Remaining ignorant of my own potential - Refusing to recognize and respond to my own desires (either acting upon loving desires or removing the causes of unloving desires) - Telling myself I have 'desire' for something when my actions do not reflect this desire and my will does not change, etc

Questions About: (...as in other principles)

Questions Answered (group 1): 00:14:50 Hunter Lydon: Are you suggesting that we should question our will and desire all the time? 00:16:21 Natalie Mann: Is the "seeking heart" a person who sincerely challenges themselves with questions? 00:16:40 Natalie Mann: Is experimenting with desire bringing oneself into harmony with self responsibility?

Questions Answered (group 2): 00:13:57 Rebecca Johnstone: How would you experiment with your current beliefs if your current beliefs are damaging to others? 00:19:49 Adria Escudero: If I do not have a desire stop sinning and will power does not work, what can I do? 00:24:21 Eloisa Lytton-Hitchins: How do I continue to nurture my desire to continue my progression rather than holding onto current "good" experiences? 00:26:45 Eloisa Lytton-Hitchins: If I exercise my desire to deal with my current condition, then does my will change? 00:31:25 Eloisa Lytton-Hitchins: So are you saying that releasing our emotions is extremely important for our progression? 00:32:00 Nicky Primetica: So is prayer so important because it is an expression of my desire for God and God's Help? 00:44:47 Lani Reid: Can you use desire to stop giving your governance away to other people? 00:48:10 Kate Eckersall: How does the desire apply to the 14 souls who have returned back to earth in their current condition?

Human Will & Desire Principles Q&A

Questions About

Human Will & Desire - What the principles are - Why the principles are applied to law - The creation and Laws affected by the principles - What the principles reveal about God - Examples of the principles' applications in Law - How will and desire operate together to create change

Questions Answered (group 1): 00:01:14 Natalie Mann: I thought my soul and errors I have absorbed drove my thoughts and beliefs, can you clarify how it is my will that does this?

00:02:24 Natalie Mann: What is the difference between human use of will and God's Gift of Free Will to the human? 00:03:27 Diana Marshall: When a desire is felt and will is developed towards attaining the desire, aren't will and desire now in harmony? 00:05:20 Diana Marshall: I thought I

could drive my will to develop a desire, but this is not going to help me isn't? 00:08:04 Mary: Example of difference between will and desire in context of becoming at-one with God. 00:10:59 Carol Parrett: If I have a desire to change based on getting away from pain, will that help me change while I am developing faith and love for God and God's Law? 00:14:10 Igor Shakhonov: What principals or laws influence or cause the inception of desire? 00:20:45 Inger Appelgren: Could giving up or not engaging any desire in a loving way, feed another person with unloving intentions and desires (like a dictator) in the same way as giving up your will could? 00:21:23 Inger Appelgren: Do we contribute to the bad state of the world if we don't engage our desire in a loving way? 00:23:16 Inger Appelgren: Why are most parents resistant to allowing their children to develop their own desires and go their own way? 00:27:52 Felix Hogel: Do God's Laws respond to my desire before responding to my will? 00:30:29 Raj Miles: Where did my desire go? 00:35:48 Natalie Mann: If desire is faith, then if I don't have faith is it actually possible for me change? 00:38:33 Glenn Kelly: How can I get my desires in harmony with what God wants for me? 00:40:58 Yvonne Joy Harris: What drives the need to be inspired continuously? 00:45:03 Melinda Tanner: Are most human instinctual needs based on addictions? 00:46:30 Melinda Tanner: Do we have a need to be safe? 00:48:00 Melinda Tanner: Do I have an instinct to grow? 00:51:23 Shula Davies: If we choose to do nothing does our soul automatically degrade? 00:54:43 Teresa French: If we only do things we want to do, even if the want is unloving, wouldn't that be a faster way to see if we are out of harmony with God, rather than wanting to do something but not doing it? 00:58:44 Lena Shakhonova: I don't understand how my soul condition can have a different will and a desire? 01:03:45 Gabee Poly: Are you saying that if will and desire are the same I am immovable? 01:05:17 Julie Cameron: Is repentance using will or desire?

Questions Answered (group 2): 00:02:05 Karen Henry: Can God gift us faith that increases our desire? If yes, what determines the reception of the gift of faith? Is it desire? 00:03:22 Karen Henry: Does the reception of God's Love always enable new desires (and greater faith) because you're now more in harmony with God's Principles? 00:06:37 Patricia Sanders: Is faith the confidence that we can accomplish what we desire? 00:10:09 Pierre Joseph: Is our level self responsibility measured by our current will unless we have a desire more in harmony with God's Laws to increase it or a desire less in harmony to lower it? 00:18:28 Rahni Longden: You said "if will and desire are in harmony change is not possible"; how does this relate to when they are both in harmony with love and truth? 00:20:40 Kerry Foley: Can you explain what new potentialities of Compensation, Responsibility, Governance, Redemption & Transformation Principles enabled by human desire means? 00:23:07 Kerry Foley: Would you say that desire pulls you through your current will state to change of your current condition? 00:25:02 Maximilian Ferraiuolo: From God's perspective is human free will predictable or predetermined? 00:29:46 Hunter Lydon: If we act on what we think are our desires but don't always feel great doing them, is it because they aren't our true desires or are we just being insincere? 00:33:45 David Raizman: Can the intensity of our desire grow as we engage it and refine our use of it? 00:35:01 Lani Reid: Can you please describe the process of purifying desire and how it can change the will? 00:41:07 Nicky Primetica: Do our guides first try to inspire us and then slowly "back off" to help us see the importance of our desire in determining our future? 00:44:47 Rebecca Johnstone: If God wants us to be emotional beings with capacity for happiness, why did God create us only with the capacity to be happy? 00:48:10 Rebecca Johnstone: Are we neutral towards our soulmate in our first incarnation? 00:49:21 Monique De Martin: Could dreaming up or imagining what I'd like to be and how I'd like to treat people be a way of igniting desire?

God's Authority

Jesus analyses the subject of loving authority, what God's Authority is, what God has authority over, what humans have authority over, the results of accepting or rejecting God's Authority, and answers audience questions on the subject

Introduction

Human law "hangover" & authority: The manner in which those in authority (parents, teachers,

custodians, law-makers and law-enforcers) treat children creates a "hangover" that has a major influence upon how each human adult views authority, and in particular views God's Authority

Definitions

Authority: The label given to the sum total of God's Principles of Scope, Hierarchy, Governance, Responsibility and Compensation working in unison through Laws that force assignment of authority to each soul that creates - Each soul is the highest authority over its creations as long as all constituent elements of its creation have been created by that soul

Love: God's definition of Love includes each soul: Governing and having power over its own creation - Being the highest point of hierarchy over its own creation - Having the final responsibility for its own creation - Being compensated for the results of its own creation

God's Authority

Scope of God's Authority: God is the Great Oversoul and has immutable authority over all of God's Principles, Laws and Creation, and potential Laws and Creation formed through God's Governing Principles, whether that authority is recognized by creation or not - God has authority over human creations that contain elements that God created: e.g. children (God created their soul, and the laws governing the bodies) e.g. elements of creation by humans that needed elements God created in order to exist or survive (i.e. most physical creations) - God does not have direct authority over human creations that do not contain elements that God created but God does have authority over the Principles and Laws that govern the effects of such creations

Human Authority

Scope of Human Authority: God does not have direct authority over human creations that do not contain elements that God created but God does have authority over the Principles and Laws that govern the effects of such creations. Humans have direct authority over human creations that do not contain elements God created. e.g. sin - e.g. a child's sin - e.g. disease in the body - e.g. my soul based spiritual condition (except any substance that exists within the soul that is from God received by choice) - e.g. my emotions out of harmony with God's Principles - e.g. my creations out of harmony with God's Principles such as creations that pollute, damage life, etc.

God has no authority over the human use of will but does have authority over its effects upon the soul and the environment because he has governance over the laws that govern the soul itself - God expects humans to destroy their own creations that are out of harmony with God's Principles, and has created laws that assist the human in the destruction of such creations

Human Choices & Decisions

Accepting God's Authority: A person who emotionally accepts God's Authority automatically loves, respects and accepts God's Personality, Attributes and Character, God's Principles, God's Laws and God's Creations and is more open to desiring God's Love

Rejecting God's Authority: **Rejection of God's Authority:** Is not possible as a real condition, but rather is an emotional imaginary condition created by humans - Is the choice to believe, feel and act as if God's Authority does not exist - Is a choice to reject God's Personality, Attributes and Character - Results in not being able to establish a relationship with God or receive God's Love - Will automatically create unhappiness, not only for myself but also for others - Is a part of my sin against the Holy Spirit

Since receiving God's Love is necessary to understand God's Principles and Laws, if I attempt to understand God's Principles without accepting God's Authority:

I am incapable of a soul based emotional understanding God's Principles, Laws, and Creations - I automatically do not love and respect God - I cannot absorb God's Truth - I cannot receive God's Love

God's Authority: Conclusion: Rejecting God's Authority:

Actual rejection of God's Authority is not possible as a real condition, but rather is the choice to act as if God's Authority does not exist. When I do this I choose to reject God's Personality, Attributes and Character. This results in not being able to establish a relationship with God or receive God's Love. Acting as if God's Authority does not exist therefore automatically creates unhappiness, for self and others, and is a part of my sin against the Holy Spirit.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose God's Authority including:

Attempting to gain direct authority over God's Creations while at the same time attempting to deny personal direct authority over our own creations and claim that the God has authority over them - Ignoring God's Principles and Laws - Ignoring God - Telling myself that it is not practical to live in harmony with God's Principles and Laws - Creating sin - Creating systems that damage harmony in the environment - Not releasing unloving emotions - Not releasing unloving beliefs - Believing and acting like I own other people (e.g. partners, children), etc

Summary

God's Authority: God has immutable authority over all of God's Principles, Laws and Creation - God has some authority over human creations that contain elements that God created - God has no authority over human creations that do not contain elements that God created - God has no authority over the human use of will but does have authority over its effects upon the soul - God expects humans to destroy their own creations that are out of harmony with God's Principles and has created Laws that assist the humans to do this

Human Authority: Humans have direct authority over what they create if those creations do not contain elements that God created - If human creations contain elements that God created, then humans do not have authority over those elements - God's Laws are working to destroy human creations out of harmony with Love

God's Authority Q&A - Questions About

Definitions: The definition of authority - How love involves authority

God's Authority: Scope of God's Authority

Human Authority: Scope of human authority

Human Choice: Accepting God's Authority - Rejecting God's Authority - The infinite potentials lost due to rejecting God's Authority

Questions Answered (group 1): 00:20:17 Tristan Miller: Is there more compensation for creating something which has a purpose to harm others? 00:48:50 Alan Atkinson: When we create a service for humanity is it going to be supported by God or not? 00:53:53 Mary: Questions from spirits Are relationships and family dynamics with people on earth my creations and my responsibility? 00:54:45 Mary: Questions from spirits: Are religious beliefs systems which I promoted while on earth my creations and my responsibility? 00:55:17 Mary: Questions from spirits: Are the way my family members abuse substances back on earth my creations and my responsibility? 00:55:58 Mary: Questions from spirits: Am I responsible for destroying these things, how can I do that, and can God help me? 00:57:03 Mary: Questions from spirits: Since I am in the spirit world how can I correct things I have created on Earth? 00:58:22 Felix Hogel: Are you saying that my emotional injuries resulting in rejecting God's Authority are of highest priority to address? 00:59:28 Felix Hogel: When you talk about projecting parental emotions onto God, is this the same as our issues with God's Authority? 01:02:25 Felix Hogel: Are you saying that a major problem is that my parents didn't love me and I am not giving up the hope to receive love from them? 01:03:17 Felix Hogel: Do people sometimes blame others besides God for their parental emotional injuries?

Questions Answered (group 2): 00:28:05 Joanne Ramundo: Can you explain more about the creation of the spheres? 00:30:34 Pierre Joseph: Why did God create potential for anger? 00:33:21 Catherine Spence: Isn't the disease a result of sin? 00:41:36 Sandra Tuszynska: In the book "The World Unseen" great artists created art in the spirit world, so will it last? 00:51:02 Fab Tolli: Can one person who has accepted God's Authority effect many people in a positive way? 00:55:54 Kerry Foley: Can you please explain further "each soul is the highest authority over its creations as long as all constituent elements of its creation have been created by that soul"? 00:59:30 Paige Willoughby: With regards to "God expects humans to destroy their own creations that are out of harmony with God's Principles, and has created laws to assist us in destroying them"; could you give examples? 01:02:39 Pierre Joseph: How can we get to love God's Authority? Can you share also your personal experience about it in the first century and in this incarnation? 01:05:46 Phoebe Bruce: Are you saying that although God did not create, for example, my facade,

and does not have authority over it; because my facade harms God's Creations (which he does have authority over), he is attempting to destroy it? 01:08:42 Phoebe Bruce: How does God help us become aware of our sin and develop a desire to do something about sin? 01:09:52 David Raizman: If God's Authority is absolute, isn't our rebellion and opposition completely futile? 01:10:47 Wayne Shaw: To accept God's Authority, do we first need to ask God to help us remove the emotional blockages to God's Authority? 01:13:05 Joyce Thompson: If each physical illness has the same cause in each person and disease was not created by God, did God create the potential for disease and then the collective human soul create the disease? 01:15:24 Joyce Thompson: How did cancer as a disease originally come about? 01:16:06 Nicky Primetica: Since God created laws to assist us in the destruction of creations out of harmony with God's Principles, when God's Principles are engaged, can improvement occur much more rapidly than degradation occurred? 01:18:18 Karen Henry: Are you saying when I have emotions, desires, beliefs, etc., in my soul out of harmony with love, I've personally created elements and subsequent combinations of elements to form unloving beliefs, emotions etc., and then my soul creates disease in my bodies and other unloving creations? 01:23:04 Karen Henry: I am doing all of this without any intellectual knowledge of the details of the process as it's only my soul perceptions that are capable of truly understanding this process, not my mind or brain?

Human Redemption Principles

Jesus briefly summarizes God's Principles of Human Redemption that govern the operation of God's Laws, gives examples of the way these principles are built into God's Laws, and answers audience questions about the principles

Terms: **Sin** is the existence of will or desire in disharmony with God's Principles whether the will or desire is acted upon or not. **Human redemption** is the process of paying the penalty for and removing sin from the human soul in order to recover the human soul back to its created pristine condition. It is a will based self reliant process that involves the enforced painful experience and release of sin related emotion. Forgiveness is accomplished through emotional "forgetfulness" of past sin and correction of the desire to sin. **Divine redemption** occurs by desiring a personal relationship with God. It is the process of desiring and engaging God's Help to remove the effects of sin and the desire to sin from the soul. It recognizes that only God can remove all the effects of sin (since sin affects other creations) and asks God to help remove the cause of sin within the soul.

Divine redemption is a God reliant process driven by desire that involves awakening to sin and becoming emotionally repentant towards God and all of God's Creations. Forgiveness is accomplished by God responding to the emotional repentant desire and God's Love enters the soul to remove the effects of sin existing in the soul, and the soul's desire to sin. During **Divine redemption** we receive God's Truth on all matters and the soul is prepared to eventually obtain immortality.

Summary: Human Redemption principles: Enforce compensation upon human will and desire - Ensure human redemption of the soul's will to recover the human soul back to its created pristine condition - Encourage a desire for Divine redemption to speed the recovery of the human soul, begin to establish and grow a relationship with God, and precondition the soul allowing transformation into the Divine to begin

Definition (What the principles are): The Law shall enforce compensation upon will and desire - The Law shall ensure human redemption - The Law shall encourage Divine redemption

Objectives (Why the principles are applied to law): To allow the soul to recover from its own degradation - To repair the soul's personal relationship with all other creation and self - To allow the removal of pain and its causes from the soul - To ensure compensation for all sins committed by the soul - To encourage within the soul the development of a desire for a more pleasant personal life and a more pleasant affect on other creation - To educate the soul about the effects of sin, and to encourage repentance and forgiveness in relation to sins committed towards self, other humans, God's Creations, God's Laws, God's Principles and God Herself - To educate the soul about its own

lack of ability and power to fully correct the results of sin without God's assistance - To encourage the soul to desire an ever expanding infinite relationship with God

Application (The creation and laws affected): All Laws governing the human soul - All Laws governing the potential of the human soul - A secondary affect on all laws and all creation

Reveals (What the principles reveal about God): God desires humans to recover from their own degradation - God desires humans to understand the cause of their own unhappiness - God desires close relationships between individual humans and between humans and other creations - God desires a loving personal relationship with every human - God rewards forgiveness and repentance - God desires humans to realize that they need God - God desires humans to exercise desire rather than being motivated by fear or forced by law - God does not bear a grudge towards sinners and does not eternally punish them - God does not need a "sacrifice" in order to forgive sin but rather God prefers obedience

Examples (The principles' applications in law): **Gravity and Aerodynamics:** Each physical law has built-in properties which examine the intention and motivation of the human. If the physical law is wilfully broken with intent to harm oneself or another soul, then there are very severe penalties imposed upon the soul with that intention and motivation, even if the intention was only felt rather than acted upon. **Law of Compensation:** The Law of Compensation itself involves the application and inclusion of every principle discussed until this point. Human Redemption principles ensure that Compensation principles are not permanently applied to the human soul without some remedial feature; otherwise the result would be the human soul never being able to recover from degradation.

Redemption of the perfect natural human: Redemption principles ensure that the human, no matter how he or she has used his or her will or desire, can recover from all the degradation and return to its original created perfection. **Development of relationship with God:** Redemption principles ensure that the human can not only redeem self without God's assistance, to the point of its original created perfection, but can also begin to be educated about the necessity of a complete relationship with God and to engage God's mercy to allow self to begin transformation from its original created condition into another creature, the Divine angel. Redemption principles allow the human to see that it needs God in order to complete the process of full redemption, and therefore any further development must also require God.

Conclusion: Human Redemption principles: The Human Redemption principles work upon my will to remove sin in order to recover myself back to the created pristine condition (human redemption). If I engage my desire, Human Redemption principles can also begin the process of entering a relationship with God and eventually obtain immortality (divine redemption).

Desire for Divine redemption will speed the emotional recovery of the human soul, begin to establish and grow a relationship with God, and precondition the soul to allow transformation into the Divine to begin.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human redemption principles including: Rejecting the concept of sin - Wilfully sinning - Rejecting God's definition of love - Retaining human definitions of love - Rejecting repentance - Immoral and unethical emotions and actions - Remaining ignorant - Attempting to reverse sickness and disease through physical means, etc

Questions About: (...as in other principles)

Questions Answered (group 1): 00:18:42 Tristan Miller: Are you saying we would need a truly sincerely desire in order to be able to engage Divine Redemption? 00:23:23 Carina Hack: Are you saying there is literally a soul based record of our life after we pass into the spirit world and how or when do we get to see it? 00:43:38 Patty Matthews: Are the Redemption Principles the sum of all Foundation, Order & Soul Principles with the objective to guide humans to desire relationship with God? 00:45:51 Jane Stein: Is it a human law hangover to feel that we have to figure out the causal emotion before we can choose to use our will differently? 00:51:37 Robert Griffiths: Could you give an example of how God's Law addresses both the cause and effect of sin and how it operates on the "soul, attitude, character, thoughts and emotions as well as the action taken"? 00:55:33 Robert Griffiths: Is it when my will and desire are in harmony that we change positively or

negatively? 01:01:11 Robert Griffiths: Are the effects of my sins are a lot bigger than I realize due to the ripple effect? 01:02:15 Rita Hogel: With repentance, if God helps remove the cause of sin is there still the need to experience all the painful effects?

Questions Answered (group 2): 00:14:32 Mary: Spirit Jacob 2nd Sphere: Can I have the desire to engage Human Redemption, rather than pain acting upon my will? 00:17:15 Rebecca Johnstone: If I desire to release my pain/sin for the sake of others, rather than for the sake to avoid my own pain? 00:26:48 Karen Pronk: Would you like to use an example of Marie in the "Harvest of Jealousy" as an example of Human Redemption Principle? 00:28:51 Karen Pronk: Is Human Redemption (redemption based on our will) an automatic process? 00:30:27 Peter Lytton-Hitchins: Does self responsibility play the major part in redemption process? 00:33:43 Bruce Carrigan: Is it faster, quicker, easier, to choose redemption now while on earth? 00:34:31 Bruce Carrigan: Will we recall what we learnt about Divine Truth while on earth when we pass into the spirit world? 00:47:41 David Raizman: Is the hardest part to start the redemption process? 00:49:44 David Raizman: After engaging Divine Redemption & Transformation, will it build faith and get easier, even if the emotions are tougher? 00:52:20 Phoebe Bruce: Is awakening to sin the first step in the redemption process? 00:57:11 Phoebe Bruce: Is realising you can't fully correct sin the first step in Divine Redemption? 00:58:51 Karen Pronk: How does the Human Redemption Principle add to what the Law of Compensation is doing? Are they not the same thing? 01:00:00 Nicky Primetica: Would it be impossible in terms of average life expectancy on earth for someone to complete the Human Redemption process due to it acting on the will of an individual in comparison to the Divine Redemption process? 01:01:09 Nicky Primetica: If we engaged in the Law of Forgiveness in childhood or as soon as somebody else damaged us, does that mean we would not ever require going through the repentance process? 01:03:01 Nicky Primetica: Hypothetically speaking, how long do you feel it would take if somebody just shut themselves away and focused solely on the process of Divine Redemption and direct engagement with God before they became at one with God? 01:04:10 Rebecca Johnstone: What do you mean by "God does not need a sacrifice in order to forgive sin but rather God prefers obedience"? 01:09:10 Nicolas Schemid: If we have a pre-destiny to become angels, how many souls already managed to achieve this? What happens to souls never achieving or taking billions of years? Does this happen too?

Human Transformation Principles

Jesus briefly summarizes God's Principles of Human Transformation that govern the operation of God's Laws and determine the human soul's future potential, and gives examples of the way these principles are built into God's Laws

Terms: Hierarchical universes can be constructed, each one governing and containing multiple universes of the lower hierarchical type. **Physical universes** are the lowest human based hierarchical universes and are the physical and spiritual universes (complete with all spheres) able to be perceived through the senses of the physical and spiritual bodies. **Soul universe** is the current highest human based hierarchical universe. It can only be perceived by the soul senses of a soul in a self-aware state and also contains unaware souls ready to incarnate. **Transformation** is the potentiality offered to the human soul with sincere and passionate desire to exceed its original created condition and potentials as a human, and to allow God's Personal Love to be absorbed by the soul in order to transform the soul into an immortal Divine creature with the potential of infinite expansion (but not infinite as God is). Transformation principles are the most complex of all of God's Principles.

Summary: Human Transformation principles: Allow desire driven transformation from the human soul into a Divine soul - Allow desire driven absorption of God's attributes by the human soul - Allow the entire soul (both halves) to join in full self-awareness - Assign the gift of immortality to the human soul who transforms - Assign the potential of infinite expansion and expression to the human soul

Definition (What the principles are): The law shall enable the transformation of the human into the Divine - The law shall offer the potential of immortality - The law shall offer other Divinely infinite

potentials to the human soul - The law shall enable the soul to create ever increasing new universes to allow for the soul's infinite expansion and expression

Objectives (Why the principles are applied to law): To create the **external** potential for every soul to understand God and receive communication and substances from God - To create the **internal** potential in every soul to understand God and receive communication and substances from God - To ensure the soul with desire can expand in its internal capabilities and awareness enough to grasp, understand, receive communication and substances from God - To allow the soul with desire to have indisputable proof of God's Personal Love and also, as a result of receiving God's Love, God's Existence & Character - To ensure the soul with desire can complete the necessary transformation required to become Divine - To allow substantive parts of God's Attributes and Character to be absorbed by the human soul - To ensure the human soul is able to become immortal - To ensure the human soul has infinite potential - To ensure the whole soul can become self-aware

Application (The creation and laws affected): All laws governing the human soul's expression of desire - All laws governing the potential of the human soul - A secondary affect on all laws and all creation

Reveals (What the principles reveal about God): God's Love is infinitely generous - God's Love does not force transformation upon unaware souls - God's Love responds to sincere desire and longing - God has a personal interest in each person and their happiness - God desires humans to understand what God feels like - God desires humans to become immortal (guarantees living forever) - God has principles and laws that govern the flow, reception and transmission of love from any source - God desires to share God's Attributes and Substances with all of her children - God desires open communication with all of Her children

Examples (The principles' applications in law): **Prayer**: Prayer is not governed by laws that contain any universe. Since prayer begins in the soul and enters the soul of God (who is not contained within any universe but who contains all universes and potential universes infinitely), the laws that govern transformation of the human soul are beyond all universes. Transformation principles enable laws governing prayer to exist and to operate in and outside of the laws governing all universes. Prayer is an emotion felt within the soul, but since the soul is connected to the two bodies, prayer feels like it is coming from the bodies.

If prayer was coming from the brain existing within the body, and was bound by the currently discovered laws of the physical universe and operating at the speed of light, and if God was only as near as the nearest star, it would take 8 years to transmit the prayer from the body to God, and another 8 years to receive a reply. **Reception of God's Love**: God's Love exists outside of all universes. Transformation principles allow God's Love to be received by souls who perceive themselves to be within the physical universe, and allow those souls to gain awareness of the union condition and expand beyond the soul universe into ever increasing universes of larger size. **The unaware soul**: The unaware unified soul does not and cannot exist within the physical universe. The unaware soul remains within the soul universe while connecting into 2 pairs of bodies (physical and spiritual) through the instinctual incarnation process in order to engage in the embryonic stage of learning about itself. The physical and spiritual bodies are required by one half of the soul in order for the soul half to experience the physical and spiritual universe. This allows the soul half to be educated about love, inter-dependence, masculinity and femininity, and a huge number of other topics. **Soul union condition**: Soul union is the condition of being completely self-aware as a unified soul. The physical and spiritual bodies cannot enter the soul universe, but the soul, due to Transformation principles not only exists in the soul universe, but potentially can expand into ever increasing hierarchical universes made from different substances and having a larger size but still contained within the infinite.

Conclusion: Human Transformation principles: Human Transformation principles are the most highly complex principles governing God's Laws and God's Highest Creation, create laws that exist outside of all current universes, and also outside of any new potential universes that could exist. Desire for and reception of God's Love is the human controlled mechanism by which transformation of the soul into a Divine creature occurs, and the transformed soul becomes

completely self-aware, is assigned the gift of immortality and has the potential of infinite expansion and expression.

Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human transformation principles including: Rejecting God - Rejecting God's Love - Rejecting God's Truth - Rejecting God's Principles and laws - Rejecting faith - Rejecting the potential of a spiritual afterlife - Agnostic or atheistic beliefs - Religious beliefs in disharmony with God's Love and Truth - Wilfully engaging unloving behaviour - Desiring ignorance - Retaining human definitions of love - Desiring to remain self reliant - Believing 'I am God' - Arrogance, narcissism, and desire to hold onto current self perception - Holding onto emotions that resist the reception of love (from any source), etc

Questions About: (...as in other principles)

Questions Answered (group 1): 00:09:07 Bruce Carrigan: In the clusters of universes you have illustrated with an earth at the centre, are they all surrounded by 35 spheres? 00:10:27 Sherry Webster: Are there other earths where people are more developed than we are on this earth?

00:13:07 Natalie Mann: Isn't the soul union state in the 21st sphere? 00:13:58 Natalie Mann: Does my soul operate and affect only this universe or does it also affect the rest of the universes?

00:23:10 Jadda Jessop: How much of God's Love do we need to receive before we are immortal?

00:32:36 Raj Miles: How does the Holy Spirit work in transmitting God's Emotion into the soul?

00:34:41 Raj Miles: Do I need to have a relationship with the Holy Spirit? 00:46:55 David

Raizman: When we are in a unified soul state and we wish to travel to a lower condition do we separate into different spirit bodies?

Questions Answered (group 2): 00:10:10 Sandra Tuszynska: Is the soul universe also compartmentalised so that self aware souls are not affecting souls that are not self aware yet?

00:11:23 Sandra Tuszynska: Is an incarnated soul basically like an unincarnated soul in that we are not really aware yet? 00:19:26 Laura Tolli: If you trusted God to become at-one with God, why is it

so hard then to trust your other half? 00:35:22 Fab Tolli: Are our bodies inside of our own soul?

00:36:36 Alwyn Campbell: Are you saying that we exist in multidimensional space? 00:38:48

Mary: Group is feeling overwhelmed and questions how everything Jesus explains applies to them

00:47:57 Rachael Bush: How different is the level of development of the other earths compared to

this one? 00:52:14 Karen Pronk: How does the potential of God withdrawing the gift of Divine Love fit with God's desire for humans to be happy? 00:53:24 Karen Pronk: Is God offering the gift

of His Love based on people having a desire for it? 00:55:33 Karen Pronk: Does God want us to learn the lesson to receive a gift when the opportunity is offered? 00:56:57 Karen Pronk: Why does

it feel like it is harder and harder for me to become at-one with God? 01:00:14 Rebecca Johnstone:

In Jesus' first century life, when no one was teaching him, what was his first formulated prayer?

Human Transformation Principles Q&A

Questions Answered (group 1): 00:01:25 Sherry Webster: Could you clarify what you mean by universes? 00:02:31 Sherry Webster: Does the physical universe include Earth, the hells and 1st to

6th spheres? 00:04:58 Sherry Webster: Does our personal responsibility increase in proportion to

our awareness of God's Laws? 00:10:34 Yvonne Joy Harris: What other Divine potentials are

offered to the soul and are potentials offered driven by desire? 00:13:37 Yvonne Joy Harris: Why did God create external and internal potentials to understand and receive communications and

substances from God? 00:16:45 Yvonne Joy Harris: Does that mean the external rules are required to allow us to pray? 00:18:39 Thalia Skopellos: Why has God created us to need him? 00:24:05

Maxine Mason: We all generally believe what our parents and teachers taught us, so why do

children get penalized for that - it feels unfair? 00:31:42 Maxine Mason: Why am I penalized for a lack of self responsibility when my parents did everything for me? 00:36:04 Shula Davies: What do

you mean by God created external and internal potentials to understand and receive

communications and substances from God? 00:36:37 Shula Davies: How are the internal and

external potentials different and what effect do each have on the soul? 00:38:00 Shula Davies: Do we begin to transform as soon as we receive God's Love or is it just when we move to the 7th

sphere? 00:48:12 Shula Davies: If we receive God's Love do we appear different to other spirits who have not receive God's Love? 00:50:38 David Raizman: Can a soul in a transformed state enact permanent change in a desirous soul or would this break the Responsibility Principles? 00:53:39 Mary: When healing people in the 1st century did you use your personal energy to heal? 00:54:39 Mary: When healing people are you removing sin or just the effects of sin? 00:57:44 Mary: Is there an energetic exchange from the soul of a developed person into the soul of a person who needs healing? 00:59:24 Mary: When we are speaking about a Divine Transformation, God can mitigate the pain the person experiences. Does the unified soul have the same power as God to act upon untransformed soul? 01:03:06 Jane Stein: Can we become at one with God while still rejecting God's Design of the soul union?

Questions Answered (group 2): 00:01:14 Claudia Vandenameele: Could you clarify the objective "to create the external potential for every soul to understand God and receive communication and substances from God"? 00:07:43 Nicky Primetica: What parts of God's Attributes & Character can be absorbed by the human soul? 00:14:30 Nicky Primetica: In order to be 100% aware of your own immortality, does that mean recognizing completely that God's Love is immortal, therefore it can never be taken away once received to a certain point? 00:18:37 Nicky Primetica: Since "God's Principles & Laws act on our desire"; does that mean our attitudes towards emotions and pain will change so that we come to love experiencing them as it means we have the opportunity to grow closer to God? 00:25:44 Richard Turner: Regarding God's Principles & Laws for Human Transformation; if there is a robust intellectual acceptance, contrasted by a violent emotional rejection, what are the chief mechanisms to address this disharmony? 00:30:07 Pierre Joseph: Is Transformation the process of God turning our soul from a finite creature into a potentially infinite creature by accepting parts of the infinite in our souls? 00:33:29 Pierre Joseph: Is receiving God's Love into the soul always safe? 00:35:18 Pierre Joseph: Will I always cry when I receive God's Love? 00:36:44 Pierre Joseph: So we need to concentrate on this desire to constantly be overwhelmed as this is what will allow us to receive God's Love 00:39:02 Maximilian Ferraiuolo: Is the Holy Spirit governed by Transformation Principles? 00:40:10 Maximilian Ferraiuolo: Does this mean the Holy Spirit will be the messenger of God's Love, Attributes, & Character etc throughout our eternal development? 00:42:02 Maximilian Ferraiuolo: Can you clarify how God's Love flows into the soul? 00:44:01 Maximilian Ferraiuolo: Is the Holy Spirit a gift and we do not know how long it will be offered for? 00:45:17 Maximilian Ferraiuolo: Is the main desire that leads to the everlasting engagement of the Transformation Principles the sincere heartfelt desire to be closer to God? 00:48:21 Rebecca Johnstone: How do you desire a gift (God's Love) without expecting it? Isn't expecting it having faith? 00:57:31 Rebecca Johnstone: By raising children as feeling superior or inferior do we take away the ability of the child to receive a gift? 00:58:20 Mary: Question from a spirit Faith is the knowledge that the gift is possible but not that the gift is an entitlement? 01:01:10 Mary: Question from a spirit: Is it that I must have the humble view point that as one of God's Children in principle God wants to love me? 01:02:14 Mary: Question from a spirit: Is my faith a knowledge that God wants to love me personally?

Knowing & Loving God

Jesus & Mary summarize the different methods that can be used to understand God's Loving Laws and discuss how knowing and loving God, and following God's Principles, leads us to automatically obey all of God's Loving Laws

Introduction

Wanting to know and love God: A person who wants to know and love someone automatically wants a relationship - Wanting to know and love God causes a strong desire to become at-one with God - The result of becoming at-one with God causes us to obey God's Principles and results in our automatically obeying God's Laws even if we are yet to discover them

What I Have Learned: God's Universe diagram (see above)

Principles Presented: Groups or classes of God's Principles: Foundation principles: Love, Truth, Life, Development, Economy, Function, Permanence, Scope. Order principles: Hierarchy,

Governance, Responsibility, Compensation. Soul specific principles: Will, Desire, Redemption, Transformation

Methods For Learning More

Method 1: Discover each of God's Laws through experimentation

Discovery process

Have will and desire for self learning only - Measure the pain resulting from the use of will and desire - Realize that a law must have been broken - Attempt to find out what the law is through experimentation - Discover God's Truth about the law - Obey each discovered law

Problems

Slowest method - Often the experimentation causes more pain - Process needs to be followed with every individual law - New laws are being created faster than we can learn about them - An almost infinite amount of laws exist - Understanding most laws at an intellectual level is impossible

Method 2: Learn about each of God's Laws from someone else

Learning law process

Learn God's Laws from someone else - Obey each learned law in every facet of one's life

Problems

Slow intermediate method - Requires a person who has already discovered each law - Process needs to be followed with every individual law - New laws are being created faster than we can learn about them - An almost infinite amount of laws exist - Understanding most laws at an intellectual level is impossible

Method 3: Learn about each of God's Principles from someone else

Learning principles process

Learn God's Principles from someone else - Obey each Principle in every facet of one's life

Problems

Faster intermediate method - Requires a person who has already discovered each Principle - Process needs to be followed with every individual Principle - Understanding Principles at an intellectual level is impossible - Understanding Principles requires God's Love to be received

Method 4: Receive Love from and learn about God

Learning principles process

Learn God's Personality, Characteristics, Attributes, Nature and Desires from God - Live a life of obedience to Principle and respect of God because you desire to

Problems

Fastest method - Understanding God requires God's Love to be received - Understanding God at an intellectual level is impossible - Requires the development of desire and a growth of will

Understanding Sin

God's Principles and Laws expose sin - Sin would not exist without the existence of God's Principles and Laws - I cannot understand sin unless I understand God's Principles and Laws - If I do not understand sin, I cannot be aware of when I sin - I sin if I live in disharmony with any single one of God's Principles or Laws

Conclusion: Knowing & Loving God: Having a relationship with God and receiving God's Love is the most rapid method of coming to understand, and also to benefit from understanding, God's Loving Principles and Laws - A person who loves God wants to accept God's Authority, and also will accept God's Principles and Laws - If I do not understand God's Loving Principles and Laws then I will not know when I am sinning, and therefore have no awareness of how to stop or remove the sin

Summary: Knowing & Loving God: The fastest method to know and love God is to learn about God's Personality, Characteristics, Attributes, Nature and Desires from God - Once I know and love God, understanding God's Principles and God's Loving Laws becomes possible - Once I understand God's Loving Laws, I begin my awakening to sin.

Next Assistance Group: Understanding Sin & Its Causes: As a part of awakening to sin, I must understand sin and its causes. To understand sin and its causes, I must have at least a rudimentary understanding of God's Loving Principles and laws.

We recommend to develop a much stronger understanding of the material we have presented in this group, and then to examine your personal life every day to see how you are working in disharmony with God's Loving Principles and laws, so that you can begin your real awakening to sin.

Future Plans - Personal progression

Jesus & Mary's progression will assist you to have more faith and desire - At the moment we see that there is not a strong desire for God for most people - We feel we need to focus on our progression to demonstrate truths to you

Ideas for assistance groups

People are still struggling to put the material into action in their day to day life - We want to help others to apply the material and come to know and love God - Dates of all future groups will be changed depending on readiness of material and on the audience readiness to receive the material.

Studio presentation of Q&A's specifically related to the three previous groups - Developing My Will To Love Q&A studio sessions - Developing My Loving Self Q&A studio sessions -

Understanding God's Laws Of Love Q&A studio sessions - Studio presentation of "Fundamental Truth" series

Understanding Sin & Its Causes - Understanding Sin & Its Causes Q&A studio sessions -

Removing Sin & Its Causes - Removing Sin & Its Causes Q&A studio sessions - Engaging God's

Laws Of Love - Engaging God's Laws Of Love Q&A studio sessions - Receiving God's Love -

Receiving God's Love Q&A studio sessions - Loving God - Loving God Q&A studio sessions

Other projects we are working on

Seminar presentations - God's Way project - Volunteer education project - Clips project -

Programming projects - Transcription project - Transliteration project - Translation project

Questions Answered (group 1):

01:48:23 Sherry Webster: Is my booking still going to be valid when you reschedule the dates of the events? 01:51:22 Jennifer Heibloem: What is the best way to donate towards the past Divine Truth events?
